Turkish threat to draw up blacklist

of EU companies

Anger over setback at Luxembourg summit

By John Barham in Ankara

Turkish officials are threatening to boycott European Union goods in retaliation for the decision by European leaders to deny Turkey equal status with 11 other coun-tries applying to join the EU.

Turkish ministers said they would draw up an informal blacklist of companies from EU countries deemed to be hostile to Turkey. Only France, Italy and the UK would be exempt.

The Turkish government has broken off political dialogue with the EU, but has rejected a proposal by some ministers to impose a trade embargo. However, Rifat Serdaroğlu, minister of state responsible for customs, said: "If there is a tender conducted by my ministry, I will close the doors to European firms. There is no official decision on an embargo, but these things are never decided officially anyway."

Isin Celebi, the trade minister, had previously warned that Turkey could impose non-tariff barriers on EU goods. He threatened several times to renegotiate a

the EU, which the government blames for last year's trade deficit of \$10.85bn with the EU.

The embargo would be difficult to impose on the free-wheeling private sector, which has reacted calmly to the outcome of last week's Luxembourg summit. However, the government has large public contracts lt could

THY, the state-owned national airline, wants to buy 49 aircraft worth some \$2.5bn by 2000. It is in negotiation with Airbus, the European aircraft consortium, and its US rival Boeing.

THY said that all contracts had to be approved by the prime minister, hut It had received no instructions to break off talks with Airbus.

The government is beginning to privatise its power generation and transmission systems, and is offering contracts to international companies to build greenfield power plants. These deals, worth about \$3bn-\$4hn a year, could also be vulnerable to Turkey's anti-EU policy.

two-year-old customs union with \$150bn on military hardware over the next 25-30 years. The military screens hids, discriminating against countries that have criticised human rights violations in Turkey or imposed export bans of

EU officials said that an embargo would violate the cus-toms union, which allows free trade of industrial goods between Turkey and the EU and requires Turkey to adopt EU commercial laws such as guaranteeing open and competitive markets.

Michael Lake, the European Commission's Ankara representative, sald a blacklist would be self-defeating. "Access to the biggest market in the world would he threatened if the customs union were put in legal jeopardy hy any form of restriction on the free circulation of goods." The EU would suffer little, given that Turkey is a small, if fast-growing. market for EU companies.

John McCarthy, head of the EU-Turkey Business Group, which comprises EU companies in Turkey, said that the threats were made in a fit of "pique" and The armed forces plan to spend should not be taken at face value.

Landfill rules agreed By Michael Smith

But the proposals are weaker than sought by the European Commission, the EU's executive, and could face opposition when debated in the European parliament early next year.

Opposition from the parliament helped to sink an earlier proposal. The Commission said yesterday its proposals had been watered down too much.

organic waste sent to landfill to 75 per cent of 1995 levels in 2006, to half in 2009 and to 25 per cent in 2016.

The countries that dispose methane, an explosive and of more than 80 per cent of powerful greenhouse gas. Waste that can no longer be dumped on tips will have to be recovered, recycled,

composted or incinerated. As well as limiting organic waste, the landfill directive securing agreement. With will also ban the dumping of tyres, require prior treat-

by ministers will not cover small islands, isolated areas or slag heaps, while it will allow waste to be disposed of in underground eites, and hazardous and non-toxic rubbish to be mixed. Another change to the Commission's draft directive removes the

Fourth firm in Swiss search

Paul Volcker, former US Federal Reserve chairman, has hired a fourth international accountancy firm in order to speed up his search for unclaimed dormant accounts of Holocaust victims in Swiss banks.

Coopers & Lybrand will contribute more than 100 auditors to work alongside the forensic auditors of Arthur Andersen, KPMG and Price Waterhouse. The extra auditing firm will concentrate on the search inside the smaller of tha 233 Swiss banks.

Mr Volcker said the second phase of his investigation had not begun because of wrangling over the terms of the insurance policy which will indemnify the auditors against risk of being sued themselves.

He said the target was still to complete the investigation by tha end of 1998. He reiterated his view thet, if US class actions against the Swiss banks came to trial, it would "enormously complicate our job". However, Edward Fagan, a lawyer involved in the US class actions, said that the Volcker committee was taking too long and he favoured a negotiated one-time global settlement of claims against the Swiss banks. William Hall, Zurich

CZECH PREMIER

Havel picks bank chief

President Vaclay Havel said yesterday that the governor of the Czech central bank, Josef Tosovsky, would be appointed prime minister today. He said the dministration would serve for only a limited period of time and would seek a vote of confidence in parliament in

Vaclay Klans, the outgoing prime minister, and his three party coalition cabinet resigned on November 30 over a party funding scandal. The new administration is likely to have a caretaker role ahead of early elections. "Mr Tosovsky enjoys the support of the three current

coalition parties and be is, as I have understood. acceptable also to the [opposition] Social Democrats," Mr Havel added. Reuters, Prague

■ DEATH OF SENNA

Williams cleared over crash

The threat of a Formula One boycott of Italy receded yesterday, after Williams-Renault team principal Frank Williams and five other defendants were cleared of manslaughter over the death of driver Ayrton Senna in the 1994 San Merino grand prix.

Mr Williams, technical director, Patrick Head, and former chief designer, Adrian Newey, were alleged to have been responsible for what the Imola prosecutor claimed was a faulty steering column weld causing Senna to crash at 220kph.

The charges caused outrage within the F1 community, partly because of the close relationship between Mr Williams and Senna and partly because of what Formula

One saw as a slight on its integrity. The FIA, motor sport's governing body, had warned it could not guarantee teams would race in Italy if the

YELTSIN TIMETABLE

Russian budget faces delay

Russian parliamentary leaders said yesterday the second tomorrow as planned, but would be postponed until at least December 24. The delay is likely to scotch the hopes of Boris Yeltsin, the president, that the budget, which has passed its first reading, would win final backing before the end of the year. His personal intervention earlier this month helped secure parliamentary support for the

budget's first reading. But Mr Yelisin, who has been recovering from a cold in a sanatorium outside Moscow, appears unlikely to repeat that performance. Russian media reported yesterday that he might stay away from work for three more weeks.

If the 1998 budget is not approved by the year's end, spending each month will be set at one-twelfth of the 1997

budget. Parliamentarians said they were delaying consideration of the budget because of a government proposal to increase spending for debt servicing and cut it from other areas. Recent turbulence in Russian capital markets has pushed up the Russian government's cost of borrowing. Chrystia Freeland, Moscow

■ UK AND EUROPE

Emu target date urged

The move towards a larger, more diverse European Union creates new opportunities for Britain, but only if it does not long delay joining the single currency, according to a report published yesterday. The report, "Equal Partner: Britain's Role in a Changing Europe", was written by a panel of mainly business and academic experts organised by the Royal Institute of International Affairs in London. It recognises the legacy that hostile rhetoric has left in

stoking public British opposition to European economic and monetary union. But it argues that Emn is so important that the Labour government must take the lead in turning public opinion around, preferably by setting a target of 2002 for Britain to adopt the euro. Joining the euro will "quickly become the defining

feature of EU membership", says the report. Even if the UK stayed out of Emu for a short time, "the loss of British influence will be swift and stark", it said. David Buchan, Diplomatic Editor

■ GERMAN ECONOMY

Business sentiment weaker

Worries about economic developments in Asia may have knocked husiness sentiment in Germany, the Munich based Ifo institute's latest survey of business sentiment suggested yesterday. Its November business climate index dropped from 99.7 to 99.1 - the second consecutive monthly fall. The German economy, which is expected to witness an significant acceleration in growth next year, is being driven largely by exports.

Meanwhile federal statistical office figures for wholesal trade prices pointed to a elight easing of inflationary pressures, with the annual rate of increase falling in November to 2.7 per cent compared with 2.8 per cent in Ralph Atkins, Bonn

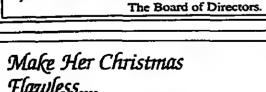

CONSORTIUM INVESTMENT

Albanian \$250m oil venture

A consortium led by Premier Oil, the independent UK exploration and production company, is to invest \$250m to exploration and production company, is to invest assum a develop Albania's biggest onshore oil field. The project, the largest single foreign investment made in Albania, is seen as a vote of confidence in the new Socialist-led government. It is expected to more than triple the country's crude oil production.

The agreement, due to be signed last night during the visit to London by Fatos Nano, Albanian prime minister, is for the development of the Patos Merinze heavy crude oil field, where production is to be increased from 6.000 barrels a day to between 25,000 and 50,000 barrels a day within four years.

The consortium includes Premier Oil, with a 25 per cent stake, Preussag, the German metals, transport and tourism group, 17.5 per cent, International Finance Corporation, 15 per cent and Albpetrol, the state-owned oil company, 42.5 per cent.

Reform programme eludes Romania

Anatol Lieven on pressure to overcome bureaucratic delays and introduce real changes

or all its brave talk about joining Nato and the European Union, Romania's year-old government is gradually ecquiring a reputation for indecisiveness, hureaucratic snarls and an inability to push through reforms.

"Thanks to the previous regime of Ion Illescu, we're already running several years behind the rest of central Europe. If we really want to join Nato and the EU, we don't have time to mess around lika this," said Dorel Sandor, a leading Romanian political scientist.

A recent government reshuffle was intended to put fresh life into the stalled reform process.

But Petre Roman, chairman of the Senate and leader of the Democratic party, which is a key part of the ruling coalition, warns that if the government is not seen to get on with effective reforms within three leader to replace Victor Ciorbea, the current prime min-

Privatisation is the touchstone of reform. But the government seems unable to chose hetween Hungarianstyle cash privatisation, which would allow foreign strategic investors to huy full control of Romanian henks and flagship iodustries at the cost of short-term job losses, or ont for the apparently less painful, but now discredited, voucher privatisation route championed by the Czech

When one compares the export and investment-led growth of the Hungarian economy with the stagnant government is much more

Czech economy, the choice would appear a foregone conclusion. But there is still real fear of foreigners taking over. The problem is a mixture of nationalism and fear that Romanian inexperience will lead to them heing cheated," a diplomat a diplomat

explained. Many Romanians favour the Czech approach because it is seen to favour domestic investors. While offering moderate encouragement to western investment, it would keep shareholdings in certein sectors fragmented rather than allow control hy a single owner. Such en approach is seen as avolding heavy unemployment and

showdowns with the unions. Foreign bankers and advisers agree that the current

reform-oriented than its predecessors. "A lot of positive things have happened in the field of macro-economics stahilisation over the past year," says Brian Lait, the local head of Deloitte and

"But all the problems with privatisation remain, partly because of the existence of competing agencies. Real moves only seem to happen in order to please the IMF. Observers with experience

elsewhere in eastern Europe say the troubles of the manian coalition are no worse than those feced by the inexperienced and ideologically divided Hungarian and Polish anti-communist coalitions in the early part of Romania is also seen as far

aheed of neighbouring Ukraine. But a favourable comparison with Ukraine is not what Romanians are looking for. Dr Sandor places much of

the hlame for government incompetence on the inexperience of ministers from the National Peasants' partyfails to take off. Christian Democrats (NPPCD), the senior parthers in the ruling coalition. This is a criticism also

made against NPPCD ministers by supporters of Mr Roman, who was prime minister in 1990-91, and who annoys his coalition partners by publicly presenting himself and his colleagues as far more skilled and experienced than the current incumbent. Mr Ciorbes acknowledged the negative impact of minis-

speech at the time of the reshuffle earlier this month. He also hlamed divisions within the coalition. By replacing political ministers with independent technocrats however, Mr Ciorbea has now left himself with no further excuses if reform

Criticism of Mr Ciorbea personally has focused on his alleged failure to get to grips with the details of government. Cahinet meetings have lasted for up to 12 hours and extended over several days, although many nothing to do with the matter at hand.

The government is further hampered by the deep resistance to change in much of the hureaucracy, and the terial inexperience in a laborious nature of the

trative process. Setting up the new privatisation ministry as part of the reshuffle, for example, could not beordered by the prime minister but needed a new law to be passed by parliament.

Western observers criticise in particular the institution "application norms". These are administrative rules which have to accompany every new law and lay down how it is to be applied

The privatisation law passed earlier this year, and intended to shorten and simplify the process, was amplified by 120 pages of minutely detailed orders. Drawing up these detailed rules takes up extra time and slows down hureaucratic processes. The foreign investment law, for example, was passed by decree in the summer. But it is still in aheyance while waiting for the normative orders to be drawn up.

A French banker called epplication norms. which derive originally from French practice, "the perverted child of a marriage between Napoleonic/Roman traditions and Communism instead of general guidelines as in France, here it is taken to mean that everything that is not explicitly allowed is

But he continued sadly: Romanian hureaucrats cannot live without such rules. With detailed instructions to follow, the official works very slowly. Without them, he is ao scared of doing something wrong that he does nothing et all. To change this may take a new

Socialists criticise ruling against Emmanuelli over election funds

French court strips senior MP of seat

France's ruling Socialists auffered their first serious setback in office yesterday when an appeal court ure of his parliamentary seat after his conviction in an illegal party financing

The ruling means that Henri Emmanuelli, chairman of the National Assemhly finance commission, is set to lose his civic rights, including his position as e deputy, for two years. The judgment by the Cour

de Cassation; France's highest appeals court, also upheld an 18-month suspended prison sentence, a FFr30,000 (\$5,000) fine and a ban on holding public office. It affirmed that Mr Emmanuelli was guilty of complicity and receipt of funds used for influence-peddling in his role as Socialist party treasurer.

In a sign of growing presdecision, François Hollande, Socialist party first secre-tary, said last hight that ha had asked for e meeting with President Jacques Chirac to

see "what it is possible to do" in the wake of the judgment against Mr Emmannelli. Under France's constitution, tha president has powers of pardon. The judg-

ment is the first definitive

financing schemes alleged to have been used hy many French political parties from Communists to the centre-right UDF groups - over the past two decade.

The Socialists used a network of consultancies called Urba to raise funds, without any evidence of work provided in exchange. Inquiries began in 1991 after a raid by Thierry Jean-Pierre, a judge who has since become a rightwing politician.

Senior Socialists including Laurent Fabius, leader of the axpressed their sympethy with Mr Emmanuelli. Pierre Mauroy, the former prime minister, said the conviction was unjustifiable because it related to events "before the adoption of legislation on political party financing".

However, the Professional Association of Magistrates hit back at attacks against the appeals court, arguing that politicians should respect the ludgment at a time of debate over the need for the justice system to be

What is it that makes Scotland the leading destination for companies setting up telephone-based service centres? The answer is people. Bright, talented, well educated people.

> With over 100 call centre operations, employing well over 15,000 people, it's plain to see that more and more companies, of all sizes, are capitalising on Scotland's high quality employee resource. the state of the s

> > But you don't need to take our word for it.

"We tend to close well over 90% of our sales contacts on first call from our Scottish call centre," explains Carol Walker, British Telecom's Glasgow Service Development Manager.

"We set very demanding requirements for the levels of expertise, education and especially commitment needed from the staff we recruited," says Lynne Harvie, Director of **BBC** Radio Helpline.

"One of the main reasons we selected Scotland was the quality of the workforce. We had 100 jobs to fill and had over 2,000 applicants," said John Morris, Operations Manager of Thomas Cook Direct, the UK's largest 'book by phone' specialist. "We are committed to a four year expansion programme and know that the local workforce can meet the qualifying standards we set."

And once you've recruited the people you need, you can be sure you'll keep them. Just ask Dérek Anderson, Relephone Sales Manager, Scotland with British Airways: "Our people have shown tremendous loyalty, dedication and commitment to the success of the company. Productivity is up and staff turnover remains in single figures."

Your company could be next. If you're looking to establish a call centre that really works, start by contacting David Scrimgeour at Locate in Scotland, he'll be happy to give you all the help you need.

Dassault wins \$2bn **UAE** order

in London and David Owen in Paris

Dassault Aviation of France received a boost yesterday when the United Arab Emirates put in a \$2bn order for 30 Mirage 2000-9 fighters. The deal, under which

Dassault will also upgrade the UAE's existing fleet of 33 Mirage 2000s, is likely to reinforce the determination of Serge Dassault, the company's head, to resist pressure to merge the company with Aerospatiale, the French state-owned group.

The agreement came during a visit to Abu Dhabi hy President Jacques Chirac who sald it meant "15,000 johs for five years in

It will mean considerable business for other companies, including France's state-owned Snecma which will supply engines, and Thomson of France which will fit radar systems to the

63 aircraft. Matra BAe Dynamics, a Aerospatiale only if the comish Aerospace and Matra,

Though yesterday's agreement was large, the defence industry is closely watching the progress of a bigger order for 80 next-generation fighters which the UAE will

place in the next few years. Dassault is competing with its Rafale, for which it so far has only 13 on order for the French air force. The favourite is likely to be a version of Lockheed Martin's F-16, though the UAE will also consider the Eurofighter, the four-nation European aircraft, after viewing a development model.

Industry observers believe the French government may try to use the Rafale programme as a bargaining chip to encourage Dassault to merge with Aerospatiale as part of plans to rationalise both the French and the European defence industry. But Dassault's improving financial position leaves it well placed to stave off such proposals. Mr Dassault has said he will merge with

include Mitsubishi, Tomen and Nissho Iwai of Japan; Unocal, GE Capital, Enron and AES Transpower of the US; and British Petroleum, Electricité de France and Asea Brown Bovari, the

Swiss-Swedish group. Few of the recommendations mada by the World Bank and K&M Engineering, the US consultants, appear to have been incorporated into the bidding documents. "This is not as far as we'd

demand in Vietnam is growing by 14 per cent a year and donors have sent clear signals in Hanoi that it cannot expect official development assistance (ODA) to find all its power needs. Yet Vietnamese officials

are refuctant to embrace the commercial concepts underpinning BOT, bankers say. "They really could get

something done quits well and to their advantage. But they seem to think that foreign investors are out to rip them off. All that does is

eigners require - and that ends up costing the Vietnamese more in the end," said another banker. Hanoi's approach to Phu

My 2.2 stands in stark contrast to recent government promises in improve the climate for foraign investors, and is likely to add to current fears that the rhetoric may not be followed by

Analysts said Hanoi had also squandered a chance to avert a power crunch, imminent as crumbling, Soviet-

Province. The scheme sets a banker advising one of the bank official said. Electricity drivs up the return that for- era power systems strain to cope with rapid growth in electricity demand.

Bids for Phu My 2.2 are dua by late February but the project is already 18 months hehind schedule due to red

Further slippage was likely because of the Asian financial crisis. Robert Dewing, managing director of project finance at Citicorp in Hong Kong, said: "The turmoil in the market means it's getting much harder to close the financing [on such

Nacco set to build China plant

By Peter Marsh in London

Nacco Industries, the biggest US maker of lift trucks, is poised to set up its first factory in China to take advantage of the country's accelerating efforts to industrialise over the next decade.

The plant earmarked for Shanghai, would be the second foreign-owned factory in China making lift trucks. It would step up Nacco's rivalry with Linde of Germany, the world's higgest producer, which set up its Chinese production unit in 1994 with an investment of DM200m (\$113m).

Lift trucks are among the most widely followed bellwethers of industrial growth, being used extensively in manufacturing, distribution and retailing.

World production is put at about 450,000 units a year, worth some \$12bn at retail prices. Nacco is in third of Japan. Last year it made Japan and the Philippines.

300

69.000 vehicles, earning Alfred Rankin, Nacco's chairman, said in an interview that the company was "actively working" on its Chiness venture. The new plant would be operated in partnership with Sumitomo Heavy Industries, the Japanese engineering company place in the industry in with which Nacco already sales, after Linde and Toyota runs lift truck factories in

The new factory, expected to be announced early next year, would mark a significant step in Nacco's global ambitions. Besides its US and Japanese plants, it has factories in Britain, Italy and the Netherlands.

Mr Rankin said that in the Chinese venture it would take a "step by step" approach. Even though the Chinese lift truck industry than he had expected, it still represented "an important future market".

At its Xiamen plant, Linde is making 3,000 trucks a year and plans hy early next cen-20,000. Total Chinese sales are put at about 20,000 a year, with most coming from local producers which commonly charge lower prices than for the more sophisticated products of western manufacturers.

Japanese companies including Toyota also have large sales operations in the

country. It is likely that Nacco would want to follow tha lead of Linde and operate its Chiness factory at least partly to sell to other parts of south-east Asia. Lift truck sales in this region, excluding China and Japan, are put at some 20,000 a year, making it roughly the same size as the Chinese market

Nacco, a holding company, sells its trucks under the NEWS DIGEST

Banana states' WTO threat

Some Caribbean countries are so concerned about their banana industry, after losing a case at the World Trade Organisation, that they are talking about withdrawing from the trade body, according to Richard Bernal, Jamaica's ambassador to the US. The region's banana industry provides 75 per cent of its gross domestic product and 85 per cent of its exports. Officials worry that if it collapses because the WTO ruling deprives it of assured markets in Europe, larger ships will no longer come to the region to trade. Trade liberalisation is a means to the end. The end is development and prosperity for all," Mr Bernal said. The WTO must recognise that there are vast differences in size and level of development among its membership." Nancy Dunne, Washington

■ TELECOMMUNICATIONS PACT

Start of WTO deal delayed

A global pact liberalising basic telecommunications is expected to come into force next February, instead of January 1 as originally planned, because a number of countries have falled to ratify the World Trade Organisation accord on time. Meeting yesterday, the 50 countries that have ratified the pact came close to agreement on a February start-date, giving extra time for laggards to ratify. A formal decision will be taken tomorrow. Of the 69 countries that signed the accord last February, 19 did not ratify by the December 1 deadline, including important markets as Belgium, Brazil, Spain and Argentina.

Frances Williams, Geneva

 Aluminium Bahrain (Alba) has signed an agreement with Germany's Mannesmann KTI to set up a \$400m cal-cined coke plant in the Gulf Arab state. Bahrain's oil and industry minister, Sheikh Isa bin Ali al-Khalifa, said the plant would be able to produce 450,000 tonnes a year of calcined coke, which is used in the manufacture of aluminium. Alba said the plant would be completed in 2000. Alba is 77 per cent owned by the Bahraini government and 20 per cent held by Saudi Arabia's Public Investment Fund. German group Breton Investments bolds the

Three foreign banks to set up in Algeria

By Roula Khalaf in London

Three forcign financial Institutions are to open commercial banks in Algeria, despite the brutal five-year civil war which has claimed 60.000 lives.

Within slx months, Citibank will upgrade its representative office in Algiers to a full bank. And with back-ing from the international Finance Corporation (IFC) the private-sector arm of the World Bank - France's sector if viable private-sector Société Générale and the projects are presented.

Corporation (ABC) will also open banking subsidiaries. The World Bank and the International Monetary Fund have been strong supporters of economic reforms in Algeria, despite criticism that financial aid has only helped to bolster the army-

backed government. According to Mansour Kclada-Antoun, IFC repre-sentative for North Africa, the agency is willing to invest outside the financial

cent of the \$20m equity in its bank, with another 10 per cent taken up by the IFC and the rest by Algerian investors. The IFC is also injecting 10 per cent of the \$10m capital in the Société Générale deal, which also includes Algerian businessmen.

Citibank has run a representative office from a hotel in Algiers, headed by an Algerian, since 1992. Citibank officials say opening a fully-fledged bank will allow them to service the growing oll and gas husiness and

operations.

The Algerian government has been eager to trumpet the arrival of foreign banks as proof of its ability to attract foreign investment in splte of the violence and international criticism of lts human rights record. So far, only the oil and gas sector, sheltered in the well-guarded southern desert, has received significant amounts of foreign investment.

Though the capital put up hy the banks is tiny compared to Algeria's needs.

■ ISRAELI UNEMPLOYMENT

Netanyahu takes crisis action Benjamin Netanyahu, the Israeli prime minister, said yesterday he was setting up an emergency committee to deal

with growing unemployment. The jobless total rose to 151,000 last month - nearly 9 per cent of the labour force. However, the rate is as high as 14 per cent in regions once dominated by manufactur-

ing and textiles but where companies have shifted production to Jordan where labour costs are lower. The Bank of Israel is under pressure to cut interest rates to boost growth and jobs. The economy will grow 2.2

per cent this year compared with 4.5 per cent in 1996. The key lending rate is 13.4 per cent. The BOI, however, wants to adhere to its tight monetary policy in a hid to curb inflation. The CPI fell 0.3 per cent last month, cutting the inflation rate to 7.9 per cent for the first 11

months of the year. Judy Dempsey, Jerusalem **■ OMAN POLITICS**

New oil minister appointed

Oman yesterday reshuffled its cabinet, appointing a new oil minister and creating a separate justice ministry, officials said. They said Sultan Qaboos issued a decree appointing Mohammad bin Seif al-Ramhi to head the renamed ministry of petroleum and gas, replacing Said bin Ahmed al-Shanfari. The decree created a separate justice ministry headed by Mohammad bin Abdullah al-Hinai, the former minister of agriculture and fisheries.

 The death toll from a cholera outbreak in Nairobi's sprawling slum areas has climbed to more than 80 prompting fears of an epidemic, a bealth worker said yes-

Jonah Kitheka, executive director of Provida International, said a combination of heavy rains, a nurses' strike, poor infrastructure and apathy among local and government authorities had made the outbreak the worst in more than a decade.

Malnutrition kills 6m children worldwide a year, says Unicef

By Frances Williams in Geneva

Malnutrition kills more children in the world than any infectious disease, war or natural disaster, yet it remains a "sllent emer-gency" arousing little public concern, the United Nations Children's Fund (Unicef) 20 says in its annual report* published yesterday. Malnutrition is implicated

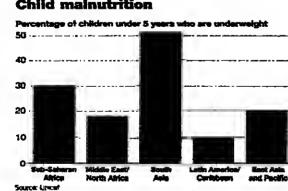

in more than 6m deaths of children under five each year, more than balf all child deaths, and leaves millions of survivors stunted physically and intellectually, according to the report. "The persistence of malnu-

trition has profound and frightening implications for children society and the future of humankind," Carol Bellamy, Unicef executive director, said yesterday.

Saharan Africa are malnourished. So too are millions of points. children, mostly from poor families in the industrialised world.

in drive to win over IMF

By Gerard Baker in Washington and John **Burton in Secut**

South Korea yestarday announced several financial reforms in a last-minute effort to convince the International Monetary Fund to approve a new tranche of funds this week as Seoul seeks to avoid possible loan defaults.

The US welcomed the latest moves by Korea to comply with the IMF programme and called on Seoul to continne to fulfil its commitments. "They have begun a process that is difficult. They have taken a number of measures that are encouraging," said Robert Ruhin, the US Treasury secretary. He said the firm progress

made in implementing the programme had heen distorted in the last week hy the repeeted pleas from Seoul for more assistance from the international community.

Analysts said yesterday'e measures were meant to per-suade the IMF to release a second tranche of \$3.5bn on Thursday under the terms of its loan agreement. Seoul hopes the IMF will offer to accelerate disbursement of additional funds to reduce the risk of Korea defaulting on ehort-term foreign deht

offering a bridging loan to the Korean government to help meet its ohligations over the next few days. Mr Rubin said. He would not oppose other countries if they wanted to provide such support. "If for some reason someone wanted to inject a bridging loan, we would see

The new proposals by Seoul followed its sudden decision to float the Korean currency, the won, from yesterday in compliance with IMF demands under its \$57bn package. The won climbed by nearly 9 per cent to 1.424 to the dollar, while the Seoul bourse rose by 4.8

The new measures include on interest rates to 40 per cent, cutting the state budget, easing rules on mergers and acquisitions, relaxing restrictions on share issues by financial institutions, and implementing guidelines on foreign takeovers of banks during the first half of 1998.

Robert Rubin

row to consider Secul'e progress and decide whether to make the second tranche of money evailable fallowing an initial dishursement of \$5.5bn last week.

Korea has got off to e rocky start in meeting IMF demands, including ite refusal to close two nearinsolvent hanks that were taken over by the state instead last week As an alternative to clo

sure, Seoul this week offered to sell one of the two trouhled banks. Korea First and SeoulBank to foreign investors. But few foreign hidders banks' large amounts of nonperforming loans.

Seoul proposed issuing a \$10bn sovereign bond issue to domestic and overseas investors to raise foreign exchange to help cover its short-term deht ohligations of \$110bn over the next year.

Nonetheless, there were continued signs of rejuctance to implement other IMF ferms, including clear corporate accounts. The securities supervisory board yesterday proposed that companies should be allowed to classify foreign-exchange losses as deferred liabilities, which would be phased out over several years.

Korean companies are estimated to have incurred up to Won20,000hn (\$11.6bn) in foreign exchange losses this half of its value.

The government had previously allowed companies to avoid reporting foreign-exchange losses on profit and loss statements by allowing them to be taken off the capital base instead. Personal View, Page 16

New Zealand warns of fall in growth

By Terry Hall in Wellington

New Zealand's Reserve Bank promised a significant easing in monetary conditions yesterday after warning in its six-monthly report of a sharp downturn in economic growth over the next three years, mainly because of the

But local interest rates immediately jumped as the New Zealand dollar fell on worries of a sharp widening of the country's balance of payments deficit.

Short-term interest rates rose 44 basis points to 8.6 per cent and the 10-year bond jumped 21 basis points to 7.13 per cent as financial markets responded to what seems to be the most cautious statement since Don Brash became governor in

The Reserve Bank forecast the current account deficit would rise to 7.7 per cent of gross domestic product in the year to next March from 4.7 per cent last year. Although this partly reflects an unusually large

outlay on defence, the New Zealand dollar fell 1.36 US cents to US\$0.580. This is well below its peak of almost 70 cents against the US currency earlier this year. Sentiment on the foreign exchange markets was further undermined by trade statistics which showed a

pared with NZ\$309m in Sepwas due to falling exports to Japan and Korea.

(US\$315m) in October, com-

Jenny Shipley, the prime minister, said last night that New Zealanders should not be too rattled by events in Asia. The economy was in e recovery mode, she said. The Reserve Bank's Mone-

tary Policy Index stood last

night at 568, nearly 60 points below the target of 625 the

financial markets are sup-

posed to meet through

adjustments in interest and exchange rates. Mr Brash said the New Zealand dollar, which has fallen about 16 per cent in recent months, was acting to

push up domestic prices. Against this, lower domes tic growth and projected weakness in some export and import prices doe to the sharp downturn in activity in parts of Asia were work-

ing to constrain inflation. Mr Brash said the most obvious risk to forecasts was that problems in Asia might turn out to be more serious than assumed. "As each day asses, reports suggest that the Asian situation is worse than envisaged just a few days before, so it is still possible we have under-estimated the situation."

There was little doubt that a significant part of New Zealand's total trade would be affected. "This means that monetary conditions may need to be easier than now projected to keep inflation in the middle of the nil to 8 per cent target range."

Last September the bank forecast the current account deficit would peak et about deficit of NZ\$528m 5.8 per cent of GDP in the year to March 1998, trending down to 4.1 per cent in 2000.

The bank yesterday fore-The deteriorating position cast the deficit would average around 7.7 per cent in the year to March next year before falling. However ft would still be around 6.4 per cent in the period up to

Pakistan success fee' admitted

By William Hall in Zurich and Jimmy Burns in London

Société Générale Surveillance (SGS), the world'e biggest inspaction and testing company, has admitted that it paid a substantial commission to a Geneva lawyer to enable it to start up a pre-shipment inspection programme for

the government of Pakistan. The admission came ahead of today's meeting of OECD ministers in Paris which is expected to sign a new convention making it a criminal offence to pay bribes to for-eign officials in order to secure contracts.

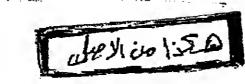

Elisabeth Salina Amorini. SGS's chairman, said the company's problems in Pakistan might lead SGS in future to avoid "certain markets where our ethical principles do not enable us to compete on an even basis". SGS is used hy governments of developing countries to prevent capital flight and customs duty evasion.

Mrs Amorini told an extraordinary meeting in Geneva yesterday that the developments in Pakistan had been "very serious" for a group whose reputation was based on providing "an independent and reliable verification" of clients' bustness transaction

SGS won the Pakistan contract in May 1992

Jean Pierre Meau, SGS senior vice-precident, told the Financial Times that his company had paid a "success fee" to Jens Schiegel milch, a Geneva-based lawyer, for "assistance" in negotiating e pre-shipment inspection services contract with Pakistan, Mr Schlegelmilch yesterday refused to

US PRODUCTIVITY

Graduate engineers spur lead

The large US productivity lead in manufacturing over Germany and the UK is due to high skills of an elite band of graduate engineers that feeds off the large resources in the US directed to technical education, according to a study to be published this week.

The report by the UK's National Institute of Economic and Social Research says the high skills of the eogineers in the upper hierarchies of US manufacturing are responsible for much of the flexibility of US plants, rather than workers doing the more menial jobs who are on average less skilled than their European equivalents. The report says 18.4 per cent of the manufacturing workfurce in the US in 1993 had skills categorised as "higher levels". equivalent to a graduate degree, compared with 9.6 per cent in the UK and 7.4 per cent in Germany. US companies issue Emu warning

By Peter Marsh in London

US manufacturers with big UK factories bave warned that they might rethink their investment strategies if Britain remains outside European economic and monetary union indefinitely.

The comments from senior executives at four big US industrial companies amount to one of the stiffest warnings yet from international investors of the potential consequences from the UK continuing its reluctance to commit to a European eingle currency.

Between them the four companies employ about 10.000 people in Britain in more than 30 plants.

Assuming Emu goes ahead with Britain permanently on the sidelines, their view is that their investments in Europe would tend to favour integration. This is because the absence of currency risks would make the trading of parts and finished

UK NEWS DIGEST

Meat substitute is export winner

British beef may still be off the European menu but Quorn, a low-fat meat substitute made from a fungus discovered in an English field, is helping to fill the export

Mariow Foods, owned by Zeneca, the pharmaceuticals company, yesterday won this year's £10,000 (£16,500) export innovation award from Food from Britain, the export marketing agency, for doubling export sales of Quorn in the past three years to nearly £9m.

Dutch, Swiss, Belgians and Irish have developed a taste for Quorn - and Germany is one of the next target markets. Marlow Foods has capitalised on the trend for "healthier eating" and lower meat consumption, said Nick Hughes, managing director.

But it has not been easy to build exports during the crisis over "mad cow disease". "All the food scares in recent years have been bad for all British food companies," he said. "On the continent they say: this is food from Britain and you have a lot of problems over there."

Quorn is derived from fusarium graminearum, a tiny nushroom-like plant discovered in a field in the early Alison Martiand, London

BROADCASTING REGULATION

Multi-channel digital TV 'at risk'

Regulation that is too complex and prescriptive is in danger of stifling a successful larnch of multi-channel digital television in the UK. according to Nigel Walmsley, broadeasting director of Carlton Communications.

Mr Walmsley, who heads British Digital Broadcasting, the 15-channel digital terrestrial service due to be lameched next October, said UK and European regulators could hamper digital television ventures through overregulation. BDB, which aims to rival British Satellite Broadcasting's forthcoming 200-channel digital service, is awaiting a licence from the Independent Television Commission because the European Commission is examining it on competition grounds. John Gapper, London

NATIONAL SPORTS ACADEMY City chosen over ex-US airbase

sports academy will be based in the northern England city of Sheffield, after the government yesterday chose its bid ahead of those from nearby Nottingham and from Upper Heyford in the Midlands. Upper Heyford is the site of a former big US Air Force base. The UK Sports Institute was the brainchild of John Major, the former ceived it in 1995 after a run of defeats for British sports teams. Chris Smith, chief sports minister, said vester day the institute would give our top athletes the

boost they need to beat the world". Mr Major's idea was inspired by the Australian academy of sport, which helped produce a world-beating cricket team. His plan gained impetus after the UK performed dismally at the 1996 Olympic Games. Labour increased the proposed funding for the academy from £100m (\$165m) to £160m after taking office.

Sheffield won the bidding largely because it already has an athletics stadium and other sports facilities worth £170m, a residue of the 1991 World Student Games which the city hosted at an unexpectedly large loss of £10.4m. Community use of some of these facilities will be restricted when the elite national sporting academy starts. Simon Kuper, London; Sheila Jones, Mancheste

PUBLIC SECTOR BORROWING

Government forecast on target

The public sector borrowing requirement remains broadly on target to meet the government's forecasts, according to latest official figures. The PSBR excluding privatisation receipts was £2.3bn in November and £6.6bn in the first eight months of 1997-98, the Office for National Statistics says. The cumulative PSBR compares with £17.9bn in the same period in 1996-97

Privatisation receipts were negligible during November. The eight-month cumulative PSBR including privatisation receipts was £4.8bn, compared with £13.9bn previously. Gordon Brown, the chancellor of the exchequer, forecast in his pre-Budget report last month a PSBR of £9.5bn. excinding the receipts of the windfall tax on privatised utilities, announced in the July Budget.

The November PSBR of 22.5bn was made up of a deficit of £3.5bn of central government's own borrowing requirement, a surplus of some £500m by a number of local authorities and a surplus of about £700m by public Wolfgang Münchau, London

of securities watchdog

Two rulings by the Court of Appeal in London yesterday strengthened the power of

operational times We are reaching the physical limits of how much beat can be dissipated by a fast microprocessor without requiring expensive cooling systems," says Michael Frank, a leading researcher in reverse computing projects at the **US Massachusetts Institute**

of Technology. Mr Frank and bis fellow researchers have shown that Moore's Law will grind to a halt unless the heat dissipation problem can be solved and that the class of technologies involved in reverse computing offers the best

In reverse computing, instead of erasing the information stored by a microprocessor after every

process, and generating lest, some of that information is retained for the next cycle. Theoretical models show it may be possible to build powerful microprocessors that use as little as one-hundredth of the power of current

This year a group of researchers at the Information Sciences Institute at the University of California said they had developed the first microprocessor that makes use of some reverse

computing technologies.
"We have produced the AC-1, a working CMOS microprocessor, that uses elements of reverse logic and uses one half the power of a similar

microprocessor, and we are working to reduce power consumption to just 10 per cent," says William Athas, the leading researcher on the project at ISI. "We've discovered that a little reversibility goes a long way in terms of cutting power consumption. The techniques we are developing will be very important to the chip

ISI is licensing its reverse computing technologies to other companies, and Dr Athas says chip giant intel bas expressed a keen interest in their work. Reverse computing

chips, bowever, will require different ways of designing chips and new ways of programming applications. MIT researchers are working on developing new programming techniques and are developing a chip called the Pendalum.

These types of chip design techniques may lead to development of 3-D chip structures in which cube-like microprocessors could be built with supercomputer levels of performance.

Internet monitoring tools

All work and no play for web users

Want to take a sneaky break to surf the net or send e-mail? Think again, Big Brother may be watching

days on the internet checking football sites, downloading games or e-mailing relatives in Australia had better watch out - their bosses may be

A raft of new software, some of it based on technology developed to protect children from sexually explicit material on the world wide web, is available to businesses seeking to monitor and limit use of the internet by employees.

At least 30 programs are available, offering employers the tools to reduce time lost when employees access web sites that deal with sex, sports and entertainment. Titles such as SmartFilter, On Guard, CyberPatrol, WebFilter, NetCop and SurfWatch can search for key words such as "sex" and block, or monitor access to, sites containing related material.

From harried salesmen in an open office wanting a break to senior managers locked away in their executive suites, extracurricular surfing has become a popular indulgence. In one celebrated case last year, a computer company in Texas fired 20 workers for surfing sexually explicit sites. Each had more than 1,000 "hits" to his name.

Demand for filtering software is increasing because a growing numher of companies worldwide have access to the internet - and are

Information Technology The FT's review of Information Technology appears on the first Wednesday of each month

mployees thinking of whil- fearful of abuse by employees. ing away their working According to one US estimate this year, 75 per cent of male employees with access to the internet sometimes visit sex sites while at work. And since the US Supreme Court ruled in June that the Communi-

cations Decency Act was unconstitutional software titles using filtering technology have been entering the market at an average rate of one a week. The act would have severely restricted the distri-bution of "indecent" material on

"The defeat of the CDA initiative was really a catalyst for our sales," says US-based On Technology, whose On Guard Internet Manager is typical of the titles available. Until recently the only wey for

companies to prevent time-wasting, or the downloading of illegal material from the internet, had been to use "firewall" software or bardware to restrict what staff could do with their internet access. Now several approaches are possible.

The main aim of firewalls is to protect against hackers, but they can also limit users to certain sites, allow them to send e-mail only to specific places and prevent then from downloading large documents, programs or images. Producers of firewalls - includ-

ing Cyberguard, Sidewinder, Borderware and Secure Computing have responded to the growing demand for these services by including block, filter and look facilities into their products' existing protective mechanisms.

ecure Computing's SmartFilter software, for example, is claimed to be the "ultimate control tool" for a corporate internet connection. Its reporting and analysis tools measure and manage internet use. The software logs all attempts to access web sites, successful and denied. including the date and time of the attempt and the response received. It can be linked to the Secure Computing firewall, which will only e-mails and see what files are being smooping by employers on staff.

allow traffic from categories on SmartFilter's control list.

On Guard can also work in conjunction with firewalls. As well as showing the network manager in real time where employees log on, it monitors whether or not they download material, and allows the blocking of any number of sites.

However, although they are effective, firewalls can be overrestrictive for users if applied too broadly, or time-consuming for administrators to maintain if only the services known to be inappropriate are blocked out.

A different approach is taken by products such as Sessionwall-3, developed by US-based Abtroet. "It lets everything through, then highlights potential abuses which can then be denied. And it works in real time," says Chris Durnan, managing director of Peopod Internet, one of two companies that distribute Sessionwall in the UK.

The software allows the user to

downloaded. And all of this can be pinnointed to individual users on the corporate network.

Other approaches include "proxy servers", which make internet conuection more efficient by downloading a site once and distributing it over a Local Area Network. That enables control of what is available to a common set of users. Serverbased tools include Sequel Technology's Net Access Manager 2.0, which logs web and intranet access, including attempts to access restricted resources. It also informs on which users exceed bandwidth quotas.

Not to be outdone, Netscape entered the fray with a new server (Compass Server 3.0) that alerts users when it discovers web pages containing selected keywords or concepts. Microsoft's Proxy Server and the Internet Policy Manager 2.0 from Aventail, a blocking server, offer other solutions.

The popularity of the filtering follow which web sites are being software is bound to raise ques-looked at, read the contents of tions about Big Brother-style

of the United Bristol NHS Trust and a Sessionwall-3 user, says be would refuse to let a manager access the software to gather intelligence on employees and says it is important that staff know the software is in use.

Phil Ryan, security products manager at E92 Plus, which also distributes Sessionwall-3 in the UK, adds: "Sessionwall performs functions which hackers and nosey technical people can easily achieve by other means. And it is accepted practice in many companies to open all incoming post and to log outgoing telephone calls."

A broader concern is the extent

to which the internet is losing its reputation as the ultimate in free information. In the US there are fears among civil liberties groups that filtering software, and a trend among providers to restrict material being posted, represents the CDA via a back door.

Its geographical position, as the small but strategically vital buffer state at the heart of the southern Balkans, has forced it to follow a different agenda from that pursued by other countries in the region, jostling at the front of the queue to join tha European Union and Nato.

Membership of both organisations remains Macedonia's long-term strategic goal However, in its early years of statehood since emerging from the collapse of Yngoslavia in late 1991 the country has faced a battle to survive. Its future has been overshadowed by the war in Bosnia, with the possibility of the conflict spreading throughout the region, and by the aggressive bilateral actions of its larger neighbours, in particular Greece.

However, in the past two years Macedonia's prospects have brightened. The Greek trade embargo, imposed by Atbens in an ill-starred attempt to try to force Macedonia to change its name, was removed, and United Nations trade sanctions against Yugoslavia (Serbia and Montenegro), Macedonia's biggest single trading

The dispute with Greece

a result of Greek lobbying the country is still known as The Former Yngoslav Republic of Macedonia (Fyrom) at the UN and in the EU - remains unsolved. But the issue has faded into the background amid increasing investment by Greek companies and a recovery in tourism, which brought more than 400,000 Macedonians to Greece on holiday last summer. Renewed problems in obtaining Greek visas ara a reminder, however, of the underlying tensions between

The end of the war in Bosnia and the first signs of economic recovery in the southern Balkans have Macedonia's chances of developing better over Macedonia's name - as ties with neighbouring "not finished its mission

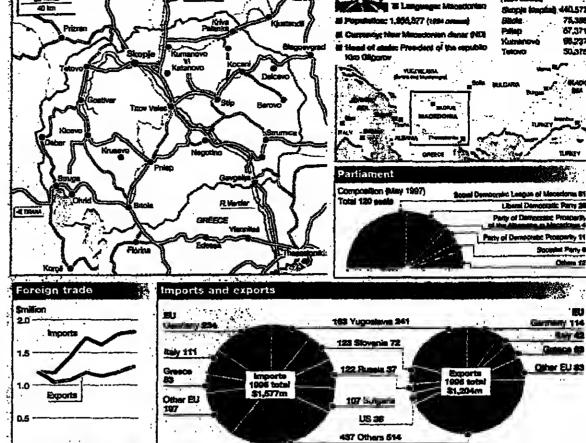

the two nations.

states. It is now preparing to upgrade road links with all its neighbours and to participate in cross-border highway and energy projects to link the region with central and restern Europe.
Trade with Bulgaria is

picking up and a cross-border gas pipeline to supply Macedonia with Russian nat ural gas is complete. However, relations are still clouded by Sofia's refusal to recognise the Macedonian language as something more than a Bulgarian dialect - a dispute that has beld up the signing of more than 20 hilateral agreements Macedonia's western and

northern borders with Albania and Serbia are still patrolled by UN peace-keeping forces, but the UN security council has recently decided that the mandate for the Unpredep (United Nations preventive deployment) forces should not be renewed when their present term ends in August next year. This is evidence that the country's security position is gradually improving and that tensions with its neighbours are easing. While the UN decision pro-

vides tangible proof of the international community's belief that the political risk posed by Macedonia is being reduced, it has received a mixed welcome in the country itself. Certainly it is a setback for the 80-year-old president Kiro Gligorov, who argues that Unpredep has

election.

yet" and that many of the in Gostivar between radical uncertainties facing Macedo-

He says that all the issues of Bosnia-Hercegovina are still open with a continued presence of foreign troops deemed necessary to prevent a resumption of hostilities, and that tensions are rising in neighbouring Kosovo with increased violence between Serbian police and armed Albanians.

Fourteen months after starting talks with Belgrade, Macedonia has still been unable to reach agreement on demarcating several sensitive stretches of its northern border with Serbia, areas which are monitored by troops from the US battalion of Unpredep.

Some western diplomats in Skopje, however, are more troubled by the threat of domestic unrest in Macedonia and inter-ethnic tension between the Slav and Albanian communities than by external problems.

Last July's bloody clashes

Albanians and the Macedonian police, the worst ethnic violence so far, have high-lighted the issue of minority rights for the large ethnic Albanian community. The growth of a radical Albanian faction, represented by the Democratic Party of Albanians (DPA), has posed a direct challenge to the gov-

ernment's policy of a grad-ual integration of Albanians into Macedonian society. The government'a excessively harsh response to the DPA's flaunting of the Albanian flag in Gostivar, together with its refusal to make concessions over the self-proclaimed Albanian university in Tetovo, has highlighted a yawning gap Mr Crvenkovski's governbetween Macedonia's atti-

bership. There will be fertile ground for those seeking to . nia's existence as an indeexacerbate domestic ten- pendent state from its sions during the coming year as Macedonia prepares tile neighbours.

The conduct of the campaign will be a heavy responability for Macedonia's young post-communist politicians, who are at last emerging from the shadow of President Gligorov. The

parliamentary elections will be held one year before Mr Gligorov departs the political stage at the end of his second five-year term, and already Branko Crvenkovski, the 35-year-old prime minister, is assuming a more important role.

ing Social Democrats will campaign next year on their record of stabilising the economy and winning gradnal acceptance of Macedosceptical and sometimes bos-

The ex-communist Social Democrats have enjoyed an easy ride in their current term because the nationalist Internal Macedonian Revolu-Organisation (VMRO), the main opposition party, and the rightwing Democratic Party were not represented in paritament after boycotting the second round of the 1994

The lack of a strong oppo-

sition undoubtedly beiped the government weather a potentially disastrous financial scandal with the collapse last February of the Tat savings bouse, amid widespread accusations of corruption and involvement by government officials, This vacuum has also allowed Mr Crvenkovski to slow down the pace of transition as the election nears, replacing the energetic market reformers in his cabinet with former high-ranking members of the communist hierarchy.

The prime minister, bowever, faces a tough task to tors.

persuade voters that a new mandate for the Social Democrats will bring the greater economic prosperity that has proved so elusive during the past three years since the last election.

in close partnership with the international Monetary Fund the government has achieved singular success in stabilising the economy. I: has brought inflation down to industrial country levels, budget deficits bave been modest and external debt levels are low compared with many countries in the

The government's record in promoting economic growth has been disappointing and Macedonia's unemployment rate of around 30 per cent is one of the highest in eastern Europe. It has faced a growing crisis in the current account of the balance of payments and was forced to take corrective action with a 16 per cent devaluation of the denar against the D-Mark in the summer, even at the risk of iigher inflation.

The higgest economic problems are at the enterprise level. According to a recent report by Merrill Lynch, the US investment bank, "even after a substantial fall in output between 1990 and 1996 there remain many enterprises which are uncompetitive and which appear to fund their losses through a mixture of interenterprise arrears, tax arrears, wage arrears and non-performing tours to the banking sector"

Restructuring has been delayed by a protracted privatisation process, which has been dominated by management and employee buyouts resulting in insiders controlling most companies

Foreign investment has been largely excluded from this first stage of privatisation, but with the process o establishing ownership almost complete, there are signs that foreign direct investment is picking up.

The government is also heginning to open up the utilities sector to privatisation. Mr Crvenkovski is hoping that next year's planned sale of a stake in the telecommunications operator to a foreign strategic investor could finally put Macedonia on the map and provide a stimulus for foreign inves-

Facing a tough election test

Macedonia's prime minister is having to perform a delicate balancing act

Branko Crvenkovski, the Macedonian prime minister, is only 35. But after five and a half years in office, he is already one of the longestserving leaders in a region where political survival means treading a fine line between patronage politica and the enforcement of market reforms.

With parliamentary elections due by next October at the latest, Mr Crvenkovski's balancing act will become still more delicate.

The coalition government led by Mr Crvenkovski's ex-communist Social Democrat League this year succeeds in weathering a financial scandal. Several senior officials were implicated and thousands of small investors lost their savings, following the collapse of the TAT savings house in the southern town of

The government has also survived the most serious thric clashes in Macedonia to date, between rint police and radical members of the Albanian minority last July in the western Macedonian town of Gostivar.

But the prime minister has sacrificed the Social Democrats' two most prominent modernisers: Jane Miljovski, the deputy prime minister, and Ljubomir Frekoski, the foreign minister. Both men were sacked last April in e cabinet reshuffle triggered

Mr Crvenknyski earned plaudits for his firm handling of the ecandal, in which the central bank governor was forced to resign and his deputy was placed under arrest on charges of abusing his authority. But his critics claim that after three years of stringent economic policles, Mr Crvenkovski is postponing impor-According to the stock tant structural reforms, such place only inside already pri- the old communist nomen-

brushes aside such charges, saying the government badly needed an overhaul. "Individualism became a problem. The government looked increasingly less like e team working together. I needed fresh people, not theorists, but people who could implement projects."

Farewell the blue helmets

Troop withdrawal will be a blow to a government still concerned about security

Reluctantly Macedonia is having to contemplate a future without the reassur-ing presence of United Nations' peacekeeping forces patrolling its sensitive northern and western borders with Serbia and Albania

The UN Security Council passed a new resolution this month to extend the mandate of Unpredep, the UN'a preventive deployment force in Macedonia, by nine months until the end of August next year. But it declared also that this should be the final period and that the troops, provided by four Nordic countries and the US, should be withdrawn "immediately thereafter." The decision is a blow to

the Macedonian government and in particular to President Kiro Gligorov. He campaigned to hring the UN peacekeepers to his fragile, newly independent country in 1992, as former Yugoslavia collapsed into the slaughter of three-and-a-half years of war in Bosnia.

Macedonia was the only part of the former Yugoslavia to achieve its independence (in 1991), followed by the withdrawal of the Yugoslav army the next year without a shot being fired. It was, however, ill-equipped to defend its newly-won sovereighty in the midst of the volatile southern Balkans.

The Security Council justified its new resolution on the grounds that there had been "a number of positive developments in the overall situation in the area" and cited, in particular, reduced tensions in Albania.

The resolution accepts, however, that peace and stahility in Macedonia continue to depend "largely on developinents in other parts of the region." It is here that Macedonia's assessment of the risks parts company with that of the UN.

the region Unpredep has not reason what would bave

interview shortly before the Security Council announced its resolution. "All reports to the UN say that this is very positive preventive diplomacy. It does not take a lot of resources and it has been very effective in preventing the war spilling over to the south.

President Gligorov argues thet many of the uncertainties facing Macedonia are as great as ever.

All the issues of Bosnia-Hercegovina are still open and the continued presence of foreign troops is deemed necessary to prevent bostilities resuming, he says. Tensions are rising in neighhouring Kosovo, with increased incidents of violence between Serbian police and armed Albanians in the sonthern Serhian province where the 90-per-cent ethnic Albanian population lives under heavy repression from

In addition simmering disputes continue hetween Greece and Turkey, while in Albania Mr Gligorov maintains that the authorities are "still far from having control over the whole country".

And 14 months after starting talks with Belgrade, Macedonia has still not reached agreement on the demarcation of several sensitive stretches of its northern horder with Serbia, areas which are monitored hy troops from the US battalion of Unpredep.

According to Macedonia's 80-year-old president the sit-uation in Serbia is "very complex and is even worse than before." He describes Vojislav Seselj, the ultra nationalist and a leading candidate for the vacant Serb presidency, as a "threat to the Balkans" because he has declared that he would not recognise the US-mediated Dayton peace accord.

President Gligorov admits "Unpredep cannot remain for ever" but points to the 25-year presence of UN peacekeepers on Cyprus. Unpredep was the first mission in the history of UN peacekeeping to have a pre-

ventive mandate but it is "In light of the situation in impossible to judge for this happened if the deployment

demarcated. Without it the

chance of natrols from either

aide meeting and firing is

higher." says one diplomatic

There must also be a com-

mitment "over many years"

to the modernisation and

training of Macedonia's own armed forces - a role that

cannot be played by Unpre-

dep troops - says a leading diplomat. The US and the

Nordic countries could do

this, possibly under the aus-

pices of Nato or as part of an

says a western diplomat.

"We don't want the neigh-

bours to re-open the Macedo-

nia question. We must not

say. We have not had a fire.

so let's get rid of the fire

observer.

Macedonia's greater certainty and confidence as an independent state may owe much to the UN military presence. Neverthelesa despite Macedonian objections, the international community, led by the US, has clearly decided that Unpredep bas served its purpose and the time has come to plan future security arrange ments without the blue-helmeted peacekeepers.

sures within the Security Council - in particular from Russia - led a year ago to a decision to reduce the number of troops by 300, from the previous strength of 1.050 (two mechanised infantry hattalions, each 500strong and drawn from the US and four Nordic countries and a 50-man support engineering platoon from Indonesia. In addition there are 35 military observers and

26 civilian police monitors). The troop reduction was delayed by the chaos in Albania hut finally implemented in November, as the station'." start of a so-called "phased exit" strategy.

The Security Council has called on Kofi Annan, the UN secretary-general, to report by June next year on how the Unpredep forces can be completely withdrawn immediately after the end of August and on the type of international presence that would be most appropriate.

fn his last report in November Mr Annan told the council any strategy should ensure that "proper successor arrangements" are in place to reassure the Macedonian government of the international community's "continued commitment to peace and stability".

Western diplomats in international presence will ba needed on the frontier with Serbia for as long as INFRASTRUCTURE • by Kerin Hope

ing a solid base

Macedonia is concentrating on reconstructing its power and

transport sectors

Starved of grants from the federal budget during Yugoslavia's final years. Macedonia, when it began life as an independent state six years ago, had virtually no funds to improve its out-dated infrastructure.

Two of the country's first loans from the European Bank for Reconstruction and Development were granted to cover emergency repairs in the power and transport

Macedonia horrowed DM38.4m from the EBRD to huild a new power transmission line from the main electricity generating complex at Bitola in western Macedonia to prevent black-outs in Skopje, the capital. Another DM17.8m loan covered equipment urgently needed to improve safety at Skopje air-

Economic growth is slowly resuming, and Macedonia is planning a series of infrastructure projects over the next decade. The projects will be financed either through funds from international agencies or through private financing on a buildoperate-transfer basis. The projects include the

upgrading of roads, and the construction of two hydroelectric power stations and a distribution network to supply industries and bousebolds in Skopje with Russian natural gas.

Macedonia sits at a crossroads in the southern Balkans, and the government puts a high priority on upgrading roads to international highway standards. The focus is on both the west-east road link with Albania and Bulgaria and the north-south road from

Serbia to Greece. Tenders are being sought from local and regional contractors to carry out construction work and to operate the highways through toll concessions, for a fixed number of years.

The first project is to upgrade a 35km road between Skopie and Tetovo in western Macedonia on the route to the Albanian border. Traffic density on this road is the highest in the country, with more than 8,000 vehicles travelling in both directions dally. Widening the road to a dual carriageway is expected to cost about \$70m and to take one

year to complete. "Every contractor here wants to be in on the Tetovo project because it is a very congested road with a hig volume of trucks as well as passenger vehicles. The other projects may take longer to get off the ground," says Aleksander Pctkov, overseas director of Granit Construction, a Macedonian contractor that has been involved in the upgrading of roads in Bulgaria.

Greek contractors are keen to upgrade a 75km stretch of the road linking Skopje with the Greek border. More than \$,000 vehicles daily travelled the road before the hreak-up of Yugoslavia; now fewer than 3,000 vehicles use the highway.

The \$195m project would link to the EU-financed Egnatia highway across northern Greece to the bor-

der with Turkey, and would for EU grants.

in the energy sector, a 82.5MW hydro unit is being built on the Tresko river. The scheme's aim is to reduce Macedonia's dependence on lignite-fired power plants, which supply more than 75 per cent of electricity requirements. The government has decided to buy Chinese equipment for the plant, which is due to come into operation in 2001.

"Hydro-power is more expensive hut we have to start diversifying. The lignite reserves may run out

> A high priority is being given to upgrading roads to international standards

within a generation," says Mihaljo Trpkovski, assistant general manager of ESM, the state-owned power company. "In the meantime we would increase the share of hydro in energy output from 22 per cent to over 30 per cent,"

The first BOT project in the energy sector would be a 250MW hydro-electric plant to be hullt on the Crven river. The cost is estimated at \$300m. But construction is not likely to start before 2000, Mr Trpkovski says. Russian natural gas has

reached Macedonla with the completion of o pipelinc from the Bulgarian border to Skopje. Up to 15 industrial companies in the city are due to start buying gas next ski, the energy minister.

therefore likely be eligible initially carry about 100m cu m of gas yearly.

A new state-controlled company, Gama, is to build a domestic gas distribution network for Skopje and later construct spur pipelines to other Macedonian cities Negotiations are under way for Gazprom, the Russian energy company, to take an equity stake in Gama hy acquiring part of a minority shareholding held by Makpe trol, a privatised company which constructed the gas

pipuline to Skopje. Looking further ahead, Macedonia is keen to participate in two oil pipeline pro jects planned in the southern Balkans.

A feasibility study is under way for ao 800km pipeline which would carry obout 30m tonnes of crude yearly from Bulgaria's Black Sea port of Burgas to Vlore in Albania, However, the start of construction would depend on the timetable for large quantities of central Asian oil becoming available to western Europe.

A second pipeline would link Thessaloniki on the northern Aegean with Skopic and would replace transport of crude between Greece and Macedonia by rad. Two Greek oil compa nies that supply Macedonia with crude have shown interest in huilding the 220km pipeline at an esti-

mated cost of \$90m. "This would be a much asier project than the trans-Balkan pipeline. The terrain is more convenient and the capacity of the pipeline wouldn't have to be more than 3m tonnes of crude yearly," says Boris Rikalov-

Improved relations boost business

PROFILE Macedonian - Greek trade and investment

magnet for Greek husinesses following a marked improvement in political relations between the two neighbours. This month, more than 140 Greek companies set out their stalls in Skopje at a trade fair organised by. Hellexpo, a state-controlled Greek company which specialises in staging commercial exhibits.

In sharp contrast with past policy, Athens is now enthusiastically promoting economic ties with Skopje It is barely two years since the Greek government yielded to pressure from the US and its EU partners and lifted an embargo on trade with Macedonia, imposed in an ill-founded attempt to make the former Yugoslav republic change its name.

The dispute is still unresolved, but under the terms of a UN-sponsored interim accord, Macedonian companies have regained access to the northern-Greek port of Thessaloniki the landlocked republic's nearest outlet to the sea. Cross-border trade has started to flourish and an increasing mumber of Greek companies are making long-term investments in-

Exhibitors at the Skopja fair included many smalland medium-sized Greek companies, from ice-creem and confectionery manufacturers to distributors of household appliances and farm machinery. These, companies have been exploring the Macedonian market from Thessaloniki, just three hours' drive from

"growing steadily and has

considering the proximity of the markets", says Alexandros Baltas, Greece's deputy economy minister... Trade with Macedonia was valued at \$167m for the first nine months this year, compared with \$232m for tha whole of 1996, according

to Greek estimates. Greek exports to Macedonia are led by consumer goods, which mainly compete against products imported from Italy, Slovenia and

Crostia. It has taken us about 18 months to capture hree quarters of the Macedonian market for consumer batteries." says Dimitar Narkov, sales manager of Axxon Skopje the Macedonian subsidiary of Germanos, a Greek battery manufacturer and distributor. "The next move will be to open the

Macedonian market to industrial batteries made by Because of its small size and position in a region still considered politically unstable. Macedonia has so far attracted little direct foreign investment compared to transition countries in central Europe. But for Greek investors in the southern Balkans who

have faced economic and

political turnoil in Bulgaria and Albania, conditions in Macedonia seem attractive The economy ministry in Athens estimates that Greek companies account for about half the \$70m \$80m of foreign hivestment in Macedonia to date. The Greeks are already involved in tobacco-processing, marble production and mining of lead and zinc, while joint ventures are planned in

brewing and soft drinks.

Greek companies have shown interest in acquiring equity stakes in Usie, the Macedonian cemen producer, and in Okta, ths oil refinery. Both companies are looking for foreign investors to inject fresh capital following their privatisation through management and employee buy-outs.

As the Macedonian government's plans to build a network of toll highways take shape, Greek · construction companies are preparing joint ventures with Macedonian counterparts in order to bid. for road projects being offered on a

build-operate-transfer basis. The Greek contractors say that in addition to. equity they can contribute experience gained from participating in BOT projects presently under construction in Greece including help in securing long-term financing from European banks.

However, tha highest-profile Greek investment to date is the Vero supermarket, the first western-style supermarket in Macedonia. Opened last May, it belongs to Veropoulos, Greece's third-largest supermarket group, which has extended its royalty agreement with Spar of Germany to include

Macedonia. Vassilis Kakajotis, the Vero manager, says the 1,000 square metre store in the Aerodrom suburb of Skopje attracts 3,000 customers a day. About 60 per cent of goods on display are imported from Greece. Veropoulos plans to open two more stores in Skopje

Ohrid is Macedonia's most important tourist resort, cut production or shut down attracting more than 50,000 visitors in summer.

The strategic plan will provide for extending waste water treatment to the Albanian side where there are few residents but the lake's waters ara polluted by factories on trying to mining waste and fertiliser run-offs from fruit

farms. Mr Trombev says: "Lake Ohrid is probably our most important natural resource. We have to develop a management programme in co-operation with the Albacountry's biggest lake and a nian government and plan unique biological reserve in carefully to avoid too much

TOBACCO Foreign investment

The aromatic tobacco grown in southern Macedonia has traditionally been the country's highest-earning export crop. in the communist era, Macedonia was a leading supplier of Oriental tobacco both to US cigarette manufacturers and to eastern Europe and the

Soviet Union. But economic transition brought problems for Macedonia's 50,000 tobacco growers. Output fell sharply despite rising prices on the world market, largely because Makedonija Tabak, the state-controlled tobacco trading company, was no longer

eligible for special state subsidies. The tohacco industry used to have a special status because of Macedonia's international position as a producer of high-quality varieties," says a Macedonian agronomist. "But a lot of farmers haven't grown tobacco in the past few years because there were very long delays in payment after the subsidies stopped.

Oriental tobacco varieties, grown mostly in the southern Balkans and Turkey, are mixed with Virginia and Burley tobaccos in the production of American blend cigarette brands.

Macedonia grows much less tobacco than the other Oriental

Hint of the sweet cigarette manufacturer, with Oriental tobacco, and used to buy about two-thirds of the annual cropsmell of success

producers, but its Yaka and Prileo varieties are prized for their aroma The country produced more than 30,000 tonnes of tobacco yearly at the end of the 1980s, with annual export earnings reaching more than \$60m. Last year's output was only 12,000 tonnes, while Makedonija Tabak's stockpile of upsold tobacco

had grown to almost 10,000 tonnes. The outlook for tobacco growers has brightened, however, following the Macedonian government's decision last year to lift controls on producer prices for tobacco and to end Makedonija Tabak's trading monopoly by opening the market to foreign investors.

Macedonia's tobacco production doubled this year to 25,000 tonnes after farmers signed contracts at higher prices with new entrants to the market and received advances amounting to 20 per cent of the value of their crop.

Three of Macedonia's 20 tobacco-processing plants have been programme and talks are under way

for disposing of another two. Last year, A. Michailides Leaf Tobacco, Europe'a biggest tobacco processor based in northern Greece, paid DM4.65m to acquire 82 per cent of Strumitsa Tabak, a southern Macedonian processor.

The Greek company, which also owns plants in Turkey, Albania. Italy and Stovakia, has invested DM4m in building a processing unit and tobacco-curing installations at the Strumitsa plant.

Alexandros Michailides, chief executive, says: "We decided to buy Strumitsa because of the quality of its management and because of its location near Greece - it helps to have factories near each other." Socotab, the US processor that is the biggest customer for Macedonian tobacco, has acquired the Jugoturun plant at Bitola in western Macedonia, Socotab

supplies Philip Morris, the US

from Makedonija Tabak.

Mr Michallides says he is . committed to buying at least 8,000 tonnes of this year's crop and has also purchased 8,000 tonnes from donlia Tabak's stockelle Despite the recovery in output this year, the government has been . reluctant to take liberalisation a stage further and allow foreign investors to introduce new tobaccos.

Mr Michailides says he is trying to overcome resistance to experimental growing of Virginia tobacco in the Strumitsa district. The Greek company has been accused by Kiro Dokuzovski, the agriculture minister, of introducing diseased tobacco varieties" to Macedonia after organising a small Virginia growing project with farmers in the Strumitsa district.

"We have the know-how from . running successful Virginia. growing projects in Bulgaria and in Turkey," Mr Michailides says. "Our growers produce excellent quality. Virginia on the Greek side of the border and we think the same can' be done on the Macedonian side.

On the privatisation line to expansion

The hope is that the utility's sell-off will put the country on the investment map

Macedonia has received less foreign direct investment than any of the countries in east Europe since the collapse of communism. The government hopes, however, that plans to begin privatis-ing the country's telecommunications ntility next year will put it on the map

for prospective investors.

Much remains to be done. bnt Branko Crvenkovski, Macedonia's prime minister, insists the privatisation will be "transparent" and in line with international stan-

dards. The task of splitting the old posts and telecommunications authority was completed in August and an international tender has appointment of a privatisation adviser to the government. From 16 applications the government has chosen a short list of three consortia Switzerland and CIBC Wood Gundy (Canadian Imperial Bank of Commerce).

Kote Langovski, who is tion programme at Makedonsell a stake of around 35 per investor. It has the ambitious aim of completing the

deal by the end of next year. The value of this single transaction is expected to exceed all of the foreign direct investment that has flowed into Macedonia to date, which totalled only \$76m from 1989 to 1996. according to the European Bank for Reconstruction and

Development. The EBRD is playing a key role in MT's development and is to take en early equity stake in the company to give added credibility to the privatisation effort. The bank has agreed to commit up to \$50m in equity. The size of its stake will be determined by the valuation of the company reached in the deal with a strategic inves-

The first EBRD equity tranche will be provided when MT is transformed into a joint stock company early next year. The second payment is to be made when the

government fulfils its com- nia hopes to reach a telemitment to establish a new phone density of 33 subregulatory framework for the telecoms sector.

sation through a \$42.6m loan signed in early 1995 to support the development of the local, long distance and international telecommunications network. MT has been launched for the financed the balance itself, most importantly by insisting on a DMI,000 down-payment or "non-refundable deposit" (reduced to DM500 in early 1997) from customled by Creditanstalt (Bank ers ordering a new line. It is Austria). Union Bank of a hefty charge in a country in which the average wage is network by 2001. little more than DM330 a month.

The scale of the challenge co-ordinating the privatisa- MT faces is indicated by the temporary satellite dish ski Telekomunikacii, says mounted on a truck outside the government intends to the headquarters building in the centre of Skopje. This cent to a foreign strategic dish is still used to transmit ball of the country's international calls.

Around \$230m has been invested in the three years from 1995 to 1997 to provide an optical fibre backbone network and to increase the number of digital exchanges, supplied mainly by Alcatel of France and Siemens of Germany. According to MT around 418,000 telephone lines should be in operation. by the end of this year, compared with 337,200 at the end

With much of the base network and switches installed the number of lines is set to rise rapidly in the final years of the decade. A \$350m investment programme planned for the five years 1998 to 2002 should provide an additional 100,000 lines in each of the next two years. The total is planned to rise to 688,000 by the end of 2000 - nearly double the 1994 level - and to 803,000 by the

end of 2002. By the end of 2000 Macedo-

scriber lines per 100 inhabitants, against around 21 at present. About 450,000 lines The EBRD is already helping to finance MT's moderniof new capacity have been ordered, with some 290,000

> analogue lines. The telephone density is planned to reach 39 per cent by 2002. The share of main lines connected to digital exchanges had already risen to 31.5 per cent by the end of 1996, compared with only 16.5 per cent two years earlier, and MT plans to complete digitalisation of the

lines aimed at new subscrib-

ers and 160,000 to replace old

MT also faces a big challenge reforming its tariff distorted with cheap local calls subsidised by very expensive international charges. Twenty per cent of its revenues now come from domestic calls which comprise 80 per cent of the traffic while 80 per cent of revenues come

only 20 per cent of the traffic. The strategic investor which buys into MT will also acquire a stake in MobiMak. its wholly-owned Global System for Mobile Communica tions (GSM) subsidiary which launched its first ser-

international calls which are

vice in September last year. Around \$18.5m has been invested so far with a further \$61m planned during the coming five years. High prices - there is as yet no competitor for MobiMak ensure that mobile phones remain an upmarket product and the preserve of govern-ment officials, businessmen and diplomats. MT is aiming to double its 12,000 subscribers to 24,000 by the end of next year, however, and it accepts that prohibitively high access fees and handset charges will have to

Awakened from a deep sleep

A surprise foreign takeover promises a lifeline for the hard-hit

Skopje works Reading the last rites over the Macedonian steel industry bas proved premature. Much of the giant Skopje mines and iron and steel works, once the mainstay of the Macedonlan economy, has either been closed or has lain idle, working only intermittently since the collapse

of former Yugoslavia. The prospects appeared bleak, but recently Makstil, one of four production units established as independent companies in the painful break-up of the old metallurgical complex, bas been thrown a lifeline with a surprise takeover of a majority stake by Duferco, one of the largest European steel traders, based in Lugano, Swit-

In its beyday at the end of the 1930s Skopje iron and strel works was producing 1.2m tonnes a year of steel products with a workforce of more than 11,500. But it coltansed to become one of Macedonia's biggest loss-makers. The works was shorn of its former markets and raw

materials supplies and iso- 250,000 tonnes-a-year electric Minco Jordanov, once gen- Russia, and to sell the steel embargo and the UN sanctions on Serbia.

newly appointed chief executive of Makstil Laborious efforts bave

been made to try to salvage something from the wreckage. Large parts of the old group have been sbut down, the workforce has been cut to barely 3,000, and the remaining operations have beeo broken up into small independent units for both production and services.

nained. But in one of the boldest moves of the restructuring, three of the complex's biggest creditors -Fersped, the freight forwarding group, Makpetrol, the dominaot Macedonian oil product trader and service station operator and Tehnometal, ooce Macedonia's biggest foreign trade group this year agreed to swap their debt for equity in part

of the steel operations. The three, all of which are privatised, acquired a 66 per cent stake in Makstil, the company formed to take on some of the core operations of the old steel complex. Makstil assets included the

lated by the Greek trade arc furnace and continuous casting plant and the 300,000 tonnes-a-year bot plate "For five to six years the rolling mill which had been plant was in a deep sleep," the main supplier of steel the main supplier of steel says Mitko Kocovskl, the plate to Croatia's shipyards.

The debt for equity swap opened the way for the new shareholders to bring in a foreign investor who would inject both capital and, most importantly, access to markets and raw materials.

Duferco has paid \$16.5m to acquire a 54.4 per cent stake in Makstil leaving its three local partners with a combined 12 per cent stake (4 per cent each), with the rest A beavy burden of debt owned by the 890-strong workforce and by a local bank and insurance com-

Jerusalem split by battle for Bernstein legacy

Stephen Pettitt reports on the bitter wrangle over a music competition held to mark the memory of the late composer

be Leonard Bernstein International Competition. devoted to a search for new conductors, singers and composers, has been engulfed by the sort of factional rivalry endemic to its host city of Jerusalem, or even found in the late composer's most famous work - West Side Story.

The state of the s

Avatisation

pansion

the various administrative bodies involved - tha the Municipality of Jerusalem and tha Jerusalem Foundation - has never been exactly relaxed. But this month things came to an undignified bead with a very public schism. The Jerusalem Foundation, a charitable organisation, was accused of failing to honour its part of a financial pledge.

The atmosphere between

Disappointed and perhaps panicked, the Israel based administration, the clumsily named Leonard Bernstein Jerusalem International Music Competitions, looked to the Bernstein estate to make up the shortfall. When it refused - finance was never part of the deal, estate chiefs insist - the Israelis in effect accused the estate of using the competition as a free advertising boarding. The estate's view is that, by lending the Bernstein stamp of approval, they had already performed a signal service to the image of the competition and of

Jerusalem. A battle of pride ensued. with all sides deeply entrenched. Inevitably local politics played a part in the debacle. Ehud Olmert, Jerusalem's rightwing mayor, widely touted as a

candidate for highest office, was beavily involved. Mr Olmert made a provocative speech in the prizegiving ceremony. summarily announcing - to the consternation of the Bernstein estate - a new competition. This would begin next year and be "in memory of Leonard Bernstein". In addition an international centre for musical competitions would be set up in Jerusalem, an idea announced almost as a

camp. Leor Segal, executive director of the Bernstein Jerusalem Competitions, expressed hitterness at what he saw as the estate's neglect of its responsibility. He protested that proceeds from the recent auction of

Murmurings about legality

came from the opposing

triumphalist coup.

some of Bernstein's personal effects at Sotheby's in New York were not going to help the competition. He even made a fuss about the destiny of rights from the sale of some Bernstein-branded pens. But the estate was adamant. Financial input was never part of the deal.

What of the future? Segal

is off to manage the orchestra in Haifa. It remains to be seen whether there is the political and artistic will - or the money - to make a success of the proposed Jerusalem-based "in memoriam" competition. The Bernstein camp wants the existing competition to continue, though never again in Jerusalem. It will take a rest for a year while new sources of finance are being sought. When it

resumes, it may well make a

virtue of being peripatetic. Amid such melodrama, it was easy to forget we were there to find one or more pieces from the six finalists worthy of a \$20,000 Bernstein laureateship. Every

composer had been required to write a piece in some way abont Jerusalem. Oddly, no composer of the six, nor, as I understand, any of the 159 original entrants, had opted to include an Arabic slant.

he jury, nominated by 14 sponsoring institutions, mostly orchestras, from around the world, was a reasonably well mixed bunch, though woe betide anything with tonal aspirations when Luciano Berio is a jury member. represent the London Symphony Orcbestra, There

were no critics, however, which I felt was a bad thing. Many of us listen rather well and we tend to have far fewer stylistic axes to grind than most composers. As it was, the jury was

split down the middle when it came to the final reckoning. The music. played by the Jerusalem Symphony Orchestra and the Israeli Chamber Players and, in three cases, sung by the Debrecen Kodály Choir from Hungary under Mendi Rodan at the Henry Crown Symphony Hall, was on the whole rather disappointing. No laureate was named. though two pieces received honourable mentions and \$10,000 apiece. They were the Basque composer Ramon Lazkano's Lamentations for chorus and orchestra and Frenchman Pascal Dusapin's Celo for cello (Sonia

Wieder-Atherton) and orchestra. Twenty-nineyear-old Lazkano's powerful piece was full of subtle, intriguing textures, its final movement in particular recalling the complexities and resonances of Berio's Sinfonia. Dusapin's work was a sonorous, lush, touching and even nostalgic three-movement work. thoroughly professional in execution. But Dusapin, 42, has been on the international scene for some

had been as a joke. Of the also-rans, the modest Korean Shinuh Lee's Psalm 20 showed more promise than achieveme mable to resist luxuriating in the sound when a more disciplined and intense

time. When I asked him why

competition he replied with

disarming candour that it

he had entered the

approach might have yielded more powerful results. The Argentinian Jose Luis Campana's Across Time (with chorus) was a brief piece of political complexity old hat although well meant. Fifty-one-year-old Romanian-Israeli Gabriei Iranyi's If I forget thee, Jerusalem, for baritone choir and orchestra contained some impressive things, it was economical in resources and intense in flavour. Paolo Rimoldi's Concertino (Kumi Ori). performed by the Israeli Chamber Players and one of few chamber works entered in the first place, was a quirky, but less than successfui, take on neo-classicism, its solo writing centred on the harpsichord and its ideas metamorohosed from Bach's Fifth Brandenburg Concerto.

Theatre

Paper tigers and other villains

be editor is speaking gleefully to his chief reporter. "This ain't a newspaper story - it's a career." Not only have they got an escaped murderer hidden in the newsroom desk, they can make a connection to accusations of sleaze at the highest city administration levels. Days and weeks of juicy front-paga revelations seem to lie brightly ahead of them. Next, the editor telephones the sub-editors about changing the main news stories. "To hell with the Chinese earthquake, what's that?... NO! Keep the rooster story! That's human interest!"

This is The Front Page, the enoch-making American comedy of journalistic manipulations, written by Ben Hecht and Charles MacArthur in 1928 about the Chicago of the day. Though three movies have been made of it (1931, 1942, 1974), the play still makes classic theatre. On the one hand, the editor, Walter Burns, is goading the reporter, Hildy Johnson, to one sensational headline story after another. On the other, Hildy is on the brink of quitting engaged and his fiancée has lined up a new job in advertising for him. On this side, rampant cynicism; on that side, hopefulness, innocence, ideals. In this combination of dark and light, The Front Page - as the critic James Harvey once wrote - captures "a certain complexity, and even mystery, of the American consciousness and character".

be hard cynicism that Walter epitomises is this play's general climate; it is set in the press room of Chicago's criminal courts building. But Hildy struggles against not only Walter but also the ingrained journalistic instincts of his worse self -throughout the play. The beauty of Hecht's and MacArthur's drama is how they make this struggle funny, and indeed how they make you laugh at tha worst corruption and criminality without losing our values. You laugh,

the chequebook journalism, the sleaze and the manipulations of

Sam Mendes, diracting this quintessential American work they sbuttle us between shock with British actors, does gloriously. The production is a triumph of ensemble: iong before the main comedy has begun to erupt, it is a joy just to watch the interplay between the hardboiled reporters (played by Nicholas Gleaves, Ian Gelder, Martin Marquez, Mark Benton, Hilton McRae, Keith Bartlett). Adam Godley as Bensinger (employing Hildy, and that the female roles

too, at the good guy reporter, a whining Woody Allen voice), are also too caricatured. If you consinger his poem about the murderer is as bad in its way as Mayor, and Ian Bartholomew seriously, you don't have much (speaking often top-speed in brilliant patter) as Sheriff "Pinky" Hartman, are fully-fleshed comic characterisations of top quality:

and hilarity with real force. Mark Thompson's design, Hugh Vanstone's lighting, and the use of the jazz song "Christopher Columbus" all make this Chicago room and milleu completely absorbing. My only reservations are that Griff Rhys Jones, for all his comic expertise, is too lightweight and cartoony for

sympathy for his better and nonjournalistic side. As Walter, however, Alun Armstrong is nothing less than a dynamo, driving the play onward with immense power from his entrance (halfway through) on. At all levels, the production shows the most brilliant ensemble and pacing to be

seen in London theatre today. **Alastair Macaulay**

Donmar Warehonse, WC2 (0171-240 4882). Sponsored by Cable & Wireless.

Knockabout Monteverdi the audience had surtitles to our bours plus of help. When Monteverdi's score prospect. When this coblossoms into song there was much to enjoy: the famed, final production of L'incoronaduet - two voices entwining in rapturous union - was as sensual

zione di Poppea started life in Munich, it apparently lasted four-and-a-balf bours, but Welsb National Opera's performance came in at 45 minutes less. Evidently somebody had taken the shears to it along the way.

That was one of the right decisions taken on the musical side of this performance. Monteverdi is a difficult composer for standard opera companies these days. because the fashion is to bear his music on period instruments. WNO proposed a compromise: they hired Rinaldo Alessandrini, one of the top Monteverdi specialists, and gave him a reduced band of WNO instrumentalists. Even with so small a number the strings sounded heavy, but the music lived and breathed with marvellous freedom.

Alessandrini's recordings have been award-winners because they have shown what Italians can do with their own early music. In Cardiff, WNO fielded an Englishapeaking cast - not so telling with the Italian text, but at least

as pure, "authentic" singing could ever get hat about David

Opera/Richard Fairman

Alden's production? In Munich it seems to have been a huge success. Reviews quoting its "mordant humour" were posted up outside the New Theatre in Cardiff, but the sort of comedy going on inside was less a satirical nip on the shin than a pantomime-style clobber over the bead with a blunt object. The drag role of Arnalta was played by Neil Jenkins as a music hall dame and Linda Ormiston's Nurse was knockabout all the way. Regulars at the theatre did not need to wait for Aladdin. They could have had their Christmas panto last week.

It seems to be a feature of all the "school of controversy" producers from the 1980s that they fall flat on their face with comedy - and even that is not funny.

Alden dealt beavy-handedly with Michael Chance's Ottone and Linda Kitchen's secretary bird of a Drusilla, too. His most amusing idea was to turn Seneca's students into schoolboy swots, scribbling his words of wisdom into their notebooks, Seneca himself, sung with simplicity by Gwynne Howell, became an armchair pbilosopher in a shabby suit.

Of course, even when it was

written, L'incoronazione di Poppeo was not intended to be a stuffy history lesson. Aiden's vision of a modern, shallow world, designed in glossy colours by Paul Steinberg, has the virtue of being immediate and vividly characterised. Serious emotions are much more his forte: Sally Burgess, playing a power dresser Ottavia, was searing in her two monologues; Catrin Wyn Davies was a glittering starlet of a Poppea and Paul Nilon's Nero. a George Michael lookalike, gave a frighteningly intense portrayal of a mind crazed by power. There is plenty of ancient Rome's excesses around us today. At its best Alden's production brought that

o Harris is a 15-year-old girl who needs a heart transplant. Hospitals in Britain have excluded her from their transplant lists because she has Down's Syndrome. On so doing they have effectively condemned her

Strathcona Theatre Company saw a television documentary about her plight and devised A Change of Heart, currently at the Young Vic Studio, as its response. This was not merely altruism on the company's part, since Strathcona's actors are themselves learning-disabled. The company has been in existence for the past 15 years and in the last three years has produced four full-length

Queen's spell.

matter

be show's designer, Katrina Lindsay, creates wonderful winter landscapes using a spare but versatile set. As well as practical but ingenious set changes there are magical treats: twinkling stars, helicopter rescues and, appropriately for a

fairy story, fairy lights. The choreography is also a delight, taking in synchronised skating. tobogganing, gypsy dancing (complete with macho duelling sequence) and the final smiling, sunlit pas de deax of the

reunited sweethearts.

The cast, all of whom bave worked on previous Strathcona productions, play a variety of roles. I particularly enjoyed Sheldon Antoine's exuberantly cool Karl and Paul Wakelin's wonderfully fogeyish professor. The show itself is explicitly

self-referential and makes it its business to be both aspirational and inspirational. The campaign for Greta/Jo's heart transplant is part of the plot and, cunningly, an advert for the power of the company's own productions is inserted in the testimony of the junior doctor, Ericsson. Together with More Grimm Tales next door, it adds up to a Christmas programme that is not just sonal bnt educative.

Pyrrhic victory

Last week's EU summit may look like a Greek triumph. But the price could be permanent partition of Cyprus

urope's soutbeastern frontier has been drawn 🚅 hetween Greeks and Turks, and it will run be very self-confident. straight through Cyprus. The south, populated by Greeks, will become part of the European Union. The north, populated by Turks, will become de facto part of Turkey, outside the EU. to Turkey that it is giving to Such, at least, is the logic of the decisions taken in Lux- countries, including those embourg and the Turkisb reaction to them.

Of course, EU leaders protest that such is not their intention. Did they not solemnly proclaim Turkey's "eligibility" to join the EU? Did they not say Turkey's candidature would be judged by "the same criteria as the other applicant states"? Did they not promise "a strategy . . . to prepare Turkey for accession by bringing it closer to the EU in every field"? Did they not, finally, invite Turkey to an annual conference of EU members and would be members, to start in London next March?

Admittedly, conference members are required to commit themselves to certain common principles. including "the settlement of territorial disputes by peaceful means, in particular through the jurisdiction of the International Court of Justice in the Hague". This is just what the Greeks have been trying to get Turkey to do with the dispute over Imia/Kardak, an uninhabited Aegean island. But Turkey is bardly Justified in describing these as "unacceptable conditions", since they are in line with what has already been declared at bilateral Greek-Turklsb

So an imaginative, selfconfident Turkish leader might have claimed Luxembourg as at least a partial success, signalling his determination to exploit its potential to the full. Unfortunately Mesut Yilmaz, the

minority coalition government hardly allows him to

There is, in any case, no way Mr Yilmaz could have hidden from Turkish public opinion the fact that the EU is unwilling to give the same kind of commitment central and east European which, in its judgment, are not yet ready for actual membership negotiations.

Turks say they cannot understand how countries sucb as Romania and Bulgaria can be thought more ready for EU membership tban Turkey. Those two countries tend to be mentioned because they are Turkey's neighbours - indeed, former Ottoman provinces and because they are still in the early stages of postcommunist economic reform. But Turks should also mention Slovakia, which has been fingered by the EU as falling short of the membership criteria on political and economic

respect for constitutional

not very imaginative; and nicetles and routinely ble to German public opinian minority. But the EU of the EU". rightly considers that it would not improve matters said in northern Europe in to exclude Slovakia from the 1950s about the number the accession process in which all 10 central and

east European applicants,

plus Cyprus, are to partici-

All 11 are invited to the formal launch of the process on March 30. Only six will then begin actual membership negotiations, but the other five will be offered "accession partnerships" and "increesed preaccession aid". Preparation of negotiations with them "will be speeded up in particular through an analytical examination of the Union acquis (the existing EU rules to which all new

members have to conform). Since Turkey is excluded from all this, it is not surprising that Turks believe the EU has no serious intention of admitting them ever. And they are probably right, Helmut Kohl, the German chancellor, gave an unusually frank account of his motives when he said In plain language, Slo- after the summit that "a, vakia is run by a populist dramatic change in the thug who shows scant number of Turks in Germany would not be tolera-

Turkish prime minister, is Yilmaz could not hide the EU's lack of commitment

his position as bead of a insults the ethnic Hungar ion nor to those in the rest

The same could have been of Italians, or in the 1970s about the number of Spaniards and Portuguese. But in those cases EU membership was seen (rightly) as part of the solution, not the problem. If Turks are now treated differently, it is not surprising they suspect racial or religious prejudice

Of course the argument can be put geographically. "Asia Minor is not part of Europe," I heard a French politician say last week. But should not the EU bave noticed this when it signed an association treaty with Turkey, explicitly intended to lead to full membership, way back in 1963?

Perhaps we should be hard-nosed about this, and say bluntly that, on reflecnon, full membership is not on. The Turks themselves might find, on reflection, that they are better off outside the EU, maintaining close commercial ties with Europe but spared the cumbersome constraints of European co-ordination as they cultivate links with

But if "Asia Minor" is excluded from Europe on geographical grounds, then n fortiori so is Cyprus, And if Cyprus is included on ethnic or cultural grounds, many Turkish Cypriots will understandably feel that they should be left out too. In any case, without a firm steer from Ankara, their leaders will neither join the EU membership talks nor reach agreement with the Greeks on reuniting the

So if Luxembourg is a victory for Greece and the Greek Cypriots it is likely to be a Pyrrhic one, with permanent partition of Cyprus

Something to beef about

From F. Schwarzenberger. Sir, One oddity in the current hysteria about that diseased British beef: because of European Union protectionism, customers in London are deprived of beef from other, BSE-free sources. Yet nobody seems to protest about that! ...

F. Schwarzenberger, 9861 East Mission Lane, Scottsdale, AZ 85258-5681,

Pfizer forum | The NHS at Fifty: The Public's View

A new MORI survey for a leading British think tank suggests that the public is prepared for some fundamental changes in the fifty - year old

National Health Service. When Britain marks the 50th anniversary of the National Health Service (NIIS) next year it will be with a sense of

propedation radies than eclebration, according to a recent survey of British public opmion. The poll, conducted by MCRI for the Social Market Foundation, shows that four out of five people tear for the tuture of the NHS, while more than half think that ambulance services, outpatients' clinics and in hospital stays will have to be paid for privately by 2007. In one sense this represents a trimuph for the NIIS It was founded with a mission to

desappoint, rationing healthcare to individuals so that vital services might be available to all in time of need. It was some thing about the British character that against this background the NHS has emerged as one of Britain's most durable and popular post-War institutions. That character though is changing. The selfrestraint and unquestioning acceptance of professional judgement on which the Health Service has traditionally relied are giving way to more critical and assertive attitudes from a population armost with creater medical knowledge

The result is an expectations can. highlighted vividly by the SMF survey. between the range and quality of health services which British people say they want and what they believe the National Bealth Service, as it is currently run, will be canable of delivering to the future.

More than three-quarters of Britons think the NHS is underfunded at a time when the financial demands un it are increasing. A look at international comparisons shows why. In spending 6

percent of its national income on publicly funded healthcare Britain is unexcentional by OECD standards. It is the lack of income from private sources which sets the UK apart. Only 15 percent of the total healthcare budget in Britain is raised privately, the average for judustrialised nations is closer to 25 percent . Not only is this difference worth at

least £4 billion annually, it effectively denies many people the opportunity of translating rising average incomes into increasing levels of personal healthcare consumption.

One asswer is simply to raise taxes so that the Government can spend more on health. When asked by opinion pollsters most people say they want this. But most political parties do not support such tax and spend policies for health, so the option is not a real one. Without more tax money, the choice is a stark one; rationize or more funding from non - state sources.

The alternative is to introduce more mixed funding into Britain's healthcare system through what is effectively fee-forservice, as we have done with optician and dental services over the last decade. One model might be to introduce a primary care annual subscription of, say, \$100 per household. This is little more than most British homes pay for a television license the subscription which funds that other great national institution, the BBC. Even if one-third of low income households were exempted, this kind of scheme would raise

£1.5 billion, a significant step towards raising the UK's level of privately financed health consumption to the OECD average.

This new funding would in fact, strengthen loyalty to local primary care and give greater freedom to providers.

Would such a scheme deter people from visiting their family doctor? The SMF's survey of the British public sugg-

ests not. Nearly two-thirds said that people go to their practitioner more often than they need to because the service is free, while 70 percent said that they would consult a doctor on less often if they were charged £5 a visit.

Many British politicians from all the main political parties are wary of reforming the NHS in this direction. They look at the popularity of the Health Service and shudder to think of the pol-

itical consequences of getting reforms wrong. But doing nothing is on longer an uption. The people of Britain want a healthcare system which reflects the way they live their lives today, not a family heirloom; the UK has to seek a new partnership between public goals and individual initiative.

Clearly time to reconsider value of gold

From Mr Abraham Aronowicz.

Sir, What financial times of delusion! The international monetary system fights bankruptcy on your December 13/14 front page ("IMF chief calls for \$160bn increase"): The magician who runs the International Monetary Fund declares: ... nothing is easier than

to proceed to a new increase in quotas, because it will not cost you a dime and it is the most efficient way to solve the problems of the

Japan bases its reflation effort on bonds mystically guaranteed by governmentowned assets. Your weekend section then declares the

feature. Is there nobody out there who considers the revival of gold as the only tool for creating monetary assets, which are not encumbered by some misguided bureaucracy's liability?

Abraham Aronowicz 1168 West 54th Ave., Vancouver, B.C.,

Personal View • Stanley Fischer

"Death of gold" as its front

IMF - the right stuff gramme began, this cannot into a massive capital out-Bailouts in Asia

are designed to restore confidence and bolster the financial system

There bave lately of programmes supported by the International Monetary Fund (including in the Financial Times). The pronot recognise the specific circumstances of the Asian crisis countries. They are said to be too contractionary, to

pusb premature financial sector liberalisation, and to encourage investor folly by providing an official ballout. I will deal with the first two points. The third is different in kind and deserves separate treatment on another When the IMF was called

in to assist both Thailand and Korea, their reserves of were dangerously depleted and investor confidence was crumbling. Once a crisis erupts, easy solutions are not available, and a growth slowdown is inevitab

The necessary first step is to rebuild confidence, which takes time and steady adherence to the economic programme, just as in Mexico. Perhaps even more so as financial sector restructuring, rather than macro. It would be economic stabilisation, is at the core of the IMF programmes in Thailand, Indonesia and Korea. Not the COUNTry short of same old medicine, but medicine to deal with the ills of foreign exchange, each patient

On the macroeconomics of for the programme design. Fund programmes must estimate a government to growth rate for ontput. Usually this projection is reasonahly optimistic, assuming only a moderate slowdown of growth. In the Korean programme, the growth rate assumed for 1998 is 2.5-3 per cent. Considering the deep crisls in which the pro-

be viewed as a contractionary goal. Rather it is an effort to prevent an inevitable slowdown from being worse than necessary.

But why ask for fiscal tightening and higher interest rates at all? We ask for no more fiscal adjustment than necessary to cover the costs of financial sector restructuring and to help restore a sustainable balance of payments. The extent of fiscal tight-

ening differs between prowhich was running a large (8 per cent of gross domestic product) current account deficit, the initial fiscal adjustment was 3 per cent of GDP. In Korea, where the current account deficit was shrinking, the adjustment is 1.5 per cent of GDP, largely to amortise the public sector costs of financial sector restructuring. The bodget allows for the amortisation costs, not the upfront capital costs, of the restructuring. because it is sensible to spread the budgetary costs over time rather than pay for them through an excessive immediate fiscal con-

Why not use an expansionary fiscal policy to offset the inevitable growth slowdown? External financing available only a few months ago has evaporated. Worse than that, a capital inflow has turned

traction.

strange, with the

take steps to keep

out private foreign capital

flow This is not the time to try to increase government borrowing. That can be done, and fiscal policy can turn a bit easier, when market confidence returns - as

it inevitably will. Turning to interest rates, recent Asian programmes started after lengthy periods wben monetary policy had sought to keep interest rates low, and reserves either poured out or the value of the currency plummeted, or both. International institutions and foreign governments then provided loans to the affected countries to help them maintain and rebuild reserves, and to restore con-

These loans were not provided to finance a continuing capital outflow, driven by low domestic interest rates. People need to be persuaded to keep their money at home or not to withdraw lt. Interest rates need to be raised, not excessively, not permanently, but to belp restore stability. Of course, higher interest rates create problems for the banking system, but the banking systems were in trouble at the start of the Fundsupported programmes, not as a result of them. As stability is restored, interest rates will come down.

Why not, as some argue,

keep interest rates low and

allow the exchange rate to depreclate further, thus relieving the economy of the strain of higher interest rates? First, exchange rates have already depreciated too much - by 30-50 per cent in the affected countries, more than any calculation of initial over-valuation. Second. devaluation strains companies that have borrowed abroad. Third, and critical, excessive devaluations would help the crisis spread worldwide. The IMF was set up in part to prevent a repetition of that disastrous syndrome and we will not ignore the systemic implications of actions taken under programmes we support.

Turning to financial sector liberalisation, each of the recent programmes in east Asia provides substantial official support to the country in difficulty. It would be strange, with the country desperately short of foreign exchange, for the government to take steps to keep out private foreign capital. South Korea has long been touted as an example of the virtues of not opening the financial sector. One of the things to learn from the current crisis is that protecting the financial sector is in part simple protectionism, with all its familiar consequences of inefficiency and a failure to meet world standards.

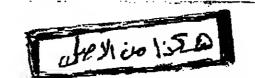

Korea's decision to allow foreign banks to buy domestic banks and foreigners to buy 50 per cent of the shares in Korean companies are surely moves in the right direction. Some express concern at the elimination of restrictions on foreign borrowing by Korean companies and at the opening of domestic bond and money markets. But, in fact, the mistake was to allow domestic banks and corporations to borrow extensively abroad without prudential controls on their foreign exchange exposure. The Korean programme

will seek to correct this through mechanisms that will be put in place in conjunction with the programmes of the World Bank and the Asian Development Bank. This is consistent with past Fund support for market based controls on short-term capital inflows though that is hardly the

prime problem at present. There are many uncertainties about how to deal with the situation in east Asia. These IMF supported programmes differ from more traditional programmes, particularly in their focus on financial sector restructuring. We have always learned from our critics. And we will

FINANCIAL TIMES

Number One Southwark Bridge, London SEI 9HL Tel: +44 171-873 3000 Telex: 922186 Fax: +44 171-407 5700 Wednesday December 17 1997

The IMF and its critics

The Intarnational Monetary at least for east Asian econo-Fund has become the world's mies. Their illness is not macroeconomic fireman. Its job is to squirt money and conditionality on financial blazes. In carrying out its job, the IMF reflects the technocratic approach of the finance ministries and central banks that govern it. But its power has bred protests, not just from borrowers, but also from respected professional economists. The question is how far these are justified.

The criticisms of the IMF can be divided into three parts: grand strategy; methods of operation; and conditionality. First, argues its critics, the

IMF is increasingly dedicated to bailing out private foreign creditors from the consequences of their folly, thereby exacerbating the instability of the financial system it is supposed to strengthen. But this error, if error it is, is not one for which the IMF is responsible. That is precisely what the great powers want it to do

IMF remains too secretive, powerful and unaccountable. To some extent, it is bound to be enough about tha detailed assumptions and goals of its operations. But it is powerful and remote. That is the price the world pays for its existence,

Third, and more immediately. critics assert that the conditions it is imposing are inappropriate, will have much to explain.

economic profligacy, but the product of mistaken exchangerate policies, fickle foreign investors and weakly regulated. even corrupt, financial systems What is needed to restore confidence is structured reform and liberalisation of the financial system, along with finance to se the panic.

In practice, however, finance is insufficient. Moreover, the IMF insists on monetary and fiscal tightening, in order - as Stanley Fischer, first daputy managing director, argues in the FT today - to "stabilise the situation." by halting the capital outflow. Yet since the programmes for Thailand, Indonesia and Korea were announced the currencies have fallen, against the US dollar, by 33 per cent, 35 per cent and (after recovery over the last two days) 16 per cent, respectively. The IMF has not restored confidence, probably because high Second, allege the critics, the interest rates aggravate the underlying illness

It would be bold to argue thet the IMF has no raison d'être, all these things. To its credit, it and risky to replace it with a has become rather less secre number of separate bodies scattive, though not yet open tered around the world. But it is reasonable to insist on openness about its programmes and external review of their underlying assumptions.

The IMF is powerful, its programmes in Asia are not yet working. If they fail, the Fund

Meat scares

The UK Labour government has lateral action from January 1. failed to learn one important lesson from the mistakes of its and imminent danger, the UK predecessor; do not get into silly rows with the European Union

The decision by Jack Cunningham, the agriculture secretary, to impose an import ban on certain types of meat will infuriate his EU partners just a few years' time. ... when he needs allies.

The British government will ba asking the EU early next year to reflect the UK's progress in combatting BSE - mad cow ban on exports of its own beef. Mr Cunningham's ban on the sale of UK beef on the bone followed hy a ban on some imported meat products have hardly improved the chances of cool and rational negotiations. In both cases, the dangers to health were minimal. Mr Cunningham's reactions seem to have more to do with domestic politics than a measured

response to safety concerns. His import han follows a lengthy discussion in the EU about whether it should prevent imports of "specified risk materials" (SRMs), which include the skulls and spinal cords of cattla and sheep and goats over 12 months. It was thought that the human form of BSE might ba caught from these parts. Under pressure from the US, the EU decided to postpone the import han but the IJK is to take uni-

If this were a matter of gravs might be justified in going it alone. But it is not. The risks in this case might be of the same order as of being struck by lightening. BSE is absent from some EU countries and is likely to be eradicated from the UK in

Strong measures are still needed to combat the disease. But a sense of proportion is also required, especially when health scares based on minusexcuse for trade protectionism.

This is the danger now. The IIS has decided to ban EII cattle and sheep meat on flimsy grounds. The EU's proposed ban on imported SRMs was drawn so widely that it threatened exports of some US pharmaceutical products. Now the UK seems to be playing its own game of tit for tat.

Mr Cunningham accused his EII colleagues of prevaricating and obfuscating. This is not the way to make friends. An EUwide ban on SRMs may, on a highly precautionary view, be justified. But it may also need to be modified to meet the US's legitimate concerns. The UK must learn that Isading in Europe requires constructive engagement on such issues. Storming out in a buff was the wrong tactic under the Conser-

Bye bye Buba

Tomorrow, the Bundesbank will whelming wish of the electorate set its 1998 M3 target. This will was to restore monetary stabilset its 1998 M3 target. This will be the last monetary target it produces before it becomes just one voice within the European Central Bank's governing council. The Bundesbank style of policy-making, bowever, will live on, as the European Central Bank bas been closely modelled on it - perhaps unwisely.

Central banking has recently been through something of a revolution. The keywords have been independence, accountability, and transparency. On the first count, the Bundesbank is well ahead of the field, having been independent since its inception in 1957.

But the Bundesbank still has a reputation for excessive secrecy, and it remains largely exempt from accountability, It does not publish the minutes of the meetings of its central bank council, where interest rates are set. It has no formal accountability to the German parliament. It does make extensive use of other channels of communication, such as speeches and statements by council members and a monthly report, but these

can send an ambiguous signal. To understand why the Bundesbank works this way, look hack at the circumstances under which it was formed. Germany had just suffered two devastating bouts of hyperinflation. Confidence in elected politicians

ity; tha way to achieve this, it was believed, was to remove the process from any interference by politicians. The Bundesbank was therefore mads as independent as possible - which meant making it unaccountable.

And over the past few years, despite the moves toward accountability and transparency elsewbere, the very success of the Bundesbank has insulated it from change. If it ain't broke, the German authorities

thought, don't fix it. History also helps to explain why the Bundesbank is so successful. It has built np. over many years, a huge stock of credibility. The public's faith in its ability explains how the Bundesbank can miss its mone tary targets around half the time, without ratcheting up

inflation expectations.

The Bundesbank has been ar extraordinarily successful institution, in spite of its stubborn refusal to accept change. But the secret of its success lies not in its institutional set-up, but in Germany'a history. The European Central Bank will he starting up under very different circumstances, at a time when the demand for information and explanation is great. It must respond imaginatively to these new realities if it is to gain the credibility that the Bundesbank

COMMENT & ANALYSIS

Everything and nothing

Japan's measures to stave off financial crisis and recession may not be enough to convince the markets, argues Gillian Tett

hen Ryutaro Hashlmoto, Japan's prime ministar, mat nervous Asian leaders this week he mada a bold pledge: "We will never let Japan trigger a global crists. We will do everything to prevent that."

Yesterday tha Japanese government started to spell out what "everything" meant, Faced with economic stagnation and the recent collapse of several banks and brokerages, it disclosed plans for Y860bn of tax cuts next fiscal year and Y10,000bn of funds to support its deeply troubled financial sector. Investors are asking them-

selves whether Mr Hashimoto's version of "everything" will be snough. The answer is that the package appears to lack enough timely concrete measures to convince markets there is no risk of a serious economic downturn in Japan. And the impression remains that the Japane ernment is unwilling - or unable - to tackle its problems with anything more than a "muddlethrough" approach.

The stakes are high and rising. Economic data bave been dire. A business survey this week showed confidence had slumped in recent months. Gross domestic product fell by L4 per cent in the six months to September though the government insists that this is distorted by consumption tax increases in April. Fears are rising that Asian turmoil could hit Japan's exports next year, particularly because Korea is its largest Asian export market.

Last month three large financial institutions collapsed. Although there bave been no more failures in recent days, weak banks and life assurance companies are under huge pressure. The financial markets continue to watch nervously for any signs of fallout as the situation worsens in Korea.

Japan is, as its officials point out, in a very different situation from Korea. As the world's largest creditor it has buge foreign exchange reserves to throw at any crisis. Reports of a joke from a US politician asking if Japan might soon join those seeking aid from the International Monetary Fund infuriated officials in Tokyo.

International unease is clear. If Japan bolsters its own economy, it could provide a motor to help the rest of Asia pull out of crisis. Conversely, if it collapses into serious recession, it could turn further falls could provoke US

ous global problem

Yesterday's measures are designed to prevent this from happening. In the short term, the Y10,000bn package to support the banking system (although the money is not due to be available until next spring) may stave off any immediate market crisis. But it may be little more than a sticking-plaster solution.

This week's measures are merely the latest in a series. Japan's ruling Liberal Democratic party and Finance Ministry have already unveiled several other preliminary packages in the past three months. These too contained bold pledges to transform Japan's situation, but like yesterday's announcement were distinctly vague on concrete details.

True, the sense of urgency has now grown. At the recent Asia Pacific Economic Co-operation summit in Vancouver, Mr Hashimoto was warned of the growing international concern that the ailing Japanese economy was

Bnt Mr Hashimoto is in no position to provide a swift solution. He came to office pledging to cut the huge budget deficit, now some 7 per cent of gross domestic product, while previous government attempts at a stimulation package in 1996 did not work. Interest rates are already at a record low. And though the yen has fallen sharply recently,

Thue hedged in, Mr Hashimoto has resorted to a hotchpotch of old and new reform ideas, carefully crafted as a compromise between different LDP factions. One is tax cuts, LDP officials

would be cut by some 3 percentage points in fiscal 1998, while taxes on securities and property transactions would also be Such measures are eminently sensible. The planned net tax

yesterday said corporation tax

because, until recently, the gov-ernment insisted that any tax reforms would have to be revenue neutral. The problem is the cuts may not go far enough, being the equivalent of just 0.2 per cent of GDP. This would not be sufficient to bolster the economy if a seri-

But the scope of these measures is also in doubt. It is unclear, for example, wbether ally be issued, or simply act as a reserve scheme to be used in case further. of new banking crises after next April. Although the government has indicated that the bonds might be used to expand the capital case of banks, the criterion

might be enough to protect depositors at failed banks or brokers, it is not enough to recapitalise all the weak banks or deal with the bad debt problem. Bad debts held hy the Japanese banking system are officially calculated at almost Y30,000bn (although some government cal- and, above all, public relations culations put them nearly three times higher). Yesterday's package, in other words, is not a final solution to the financial

Although the markets would few of

Janan's trading partners believe a solution can be secured merely lem. "The sad truth is there is no magic wand that will solve all the problems," says one diplo-mat. "What is needed is lots of separate, practical measures."

Indeed, yesterday's package is unlikely to be the final word. More measures to deregulate the economy may be announced, even as early as today. The Ministry of Finance's budget plans will come on Friday and, even the Y10,000bn bonds would actu- after thet, more proposals could emerge if the economy weakens

Some suspect this week's package may turn out to be just another step in the building of a Japanese consensus, it may not hear fruit for several more months. "I think income tax cuts will come eventually," says Professor Takatoshi Ito of Hitotsubashi University. "That is what is needed."

The rub is that such hopes for the future may do little to reassure investors now. The problem in Japan, as elsewhere in Asia, is one of confidence and presentation.

Investors are demanding more than vague pledges about future measures to stave off crisis. They want signs of clear, co-ordinated Japanese officials might retort and rapid policies. This week's

that it was never intended to be. package provides a start to this. Unfortunately, it has probably dearly love a grand gesture to not gone far enough to satisfy all little known outside Tokyo and

Policymakers in limbo regarded as a main culprit for executive. The Bank of Japan is

Dan Harada, a local political the bureaucrats rather than policonsultant, has been besieged by

Panic

attack

■ Votislav Seseli, the ultra-nationalist former paramilitary leader contesting Serbia's presidential run-off this Sunday, has attracted the wrong kind of attention again, thanks

to his bull-necked, Porschedriving bodyguard Petar Panic. Police have arrested Panic after he beat unconscious a 47-year-old resident of Zemun, the picturesque Belgrade suburb on the banks of the Danube where Seselj - locals call him the Red Duke, US Balkans envoy Robert Gelbard called him a

fascist - is mayor. Branko Munjiza got annoyed when someone started building a sales kiosk outside his house, and was filling in the foundations when Panic arrived and attacked him. The brutal response has fuelled suspicion that Seself's Radical party is

benefiting from the proliferation

of building sites.

The Socialist regime's newspaper Politika – keen to see its man Milan Milutinovic come through on Sunday - has made much of the affair, demanding an end to the "kiosk terror". In July, Panic worked over a lawyer who threw a glass of water over Seseli: the Red Duke insisted that the lawyer had

slipped on a banana skin

explanation of Munjiza's plight should be worth hearing.

Howzat! ■ The Patronat, the French employers' federation, broke new ground yesterday by choosing a president versed in the arcane art of cricket scoring. Ernest-Antoine Seillière

acquired the skill nearly 50 years

ago during two years at school in England. If he can cope with the byzantine world of no-balls, silly mid-offs and malden overs, he'll have no trouble keeping a straight hat on the notoriously sticky wicket of French government business relations.

Banker drafted ■ Czech premier elect Josef Tosovsky is very tall and very polite - a contrast to Vaclav Klans, the spiky, self-opinionated economist who

fell from power last month. The central banker was a tenacious critic of Klaus's economic policies, arguing that his stubborn insistence on a fixed exchange rate merely encouraged speculative capital inflows and suffocated exporters. Tosovsky was vindicated in May by a run on the currency and enforced devaluation. The official line is that

President Vaclay Havel despised by Klaus who saw intellectuals as ineffectual and usually irresponsible to boot chose Tosovsky because he was politically neutral, acceptable

both to the ruling coalition and the opposition social democrats. But the president must feel some satisfaction in replacing Klaus with a man who is not only an intellectual but also the banker who proved Klaus to be

markets were telling him.

out of touch with what the

Foreign policy ■ A few years back, Pehr Gyllenhammar was the most popular man in Sweden, beating even King Carl Gustaf in the opinion nolls. But the love affair turned sour along with Gyllenhammar's plans to turn Volvo into an industrial powerhouse: these days the author of I Believe in Sweden is more likely to be seen in London

than Cothenburg and has a string of UK directorships. The well-connected 62-year-old will be one of only a handful of continental Europeans at the top of FT-SE 100 companies when he takes the chair at Commercial

Union next year. CU has always cut a cosmopolitan dash in the pin-striped ranks of British insurers, and four years ago

bought Groupe Victoire of

France. Chief executive John Carter, an unassuming actuary, will be as keen as anyone not to

be left standing in the next round of deal-making. Who better than Gyllenbammar – founder of the European Round Table of Industrialists and nowadays a cog in Lazard's well-oiled

machine - to help CU maintain

lts continental drift?

Crédit rating ■ So much for the French government's attempts to redress the balance of power between the executive and the legislature by keeping

parliament more in the picture.

Economics, finance and

industry minister Dominique Strauss-Kahn took great pains to ensure that the first to know of his plans for reforms to the mechanisms set up to bail out Crédit Lyonnais yesterday morning would be the National Assembly finance commission.

But yesterday the appeal court removed Henri Emmanuelli's right to sit in parliament when it upheld a judgment against him for his role in illicit fund-raising for the Socialist party. Emmanuelli also happened to be chairman of tha finance commission, so the meeting had to be postponed. By the time deputies were briefed, the

decision was all over the media.

Ginancial Times

100 years ago Austro-Hungarian Relations Buda-Pesth, 16th Dec. The

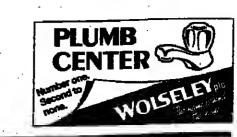

Lower House of the Hungarian Diet to-day began

the discussion of the Independent Hungarian Bill for the provisional regulation of the economic relations between Hungary and Austria, which, having passed the Finance Committee, is now again before the House. M. Pulszky, the reporter, said: "With the end of the year, the existing treaty relations between Hungary and Austria lapse, and consequently an independent regulation of these relations has to be made. However, any sudden change would be a danger for both states, and that change could jeopardise the prestige of the Monarchy with Europe. 50 years ago

Monetary Upheavals City circles were still discussing yesterday the implications of tha drastic monetary reforms in the Soviet Union. One observer expressed the opinion that this development serves to emphasise the extent to which physical controls are gradually breaking down. In many countries, ample evidence is available of the way in which people with the wherewithal are able to ride roughshod over all the

regulations.

bad disappeared. The over- has enjoyed.

Bonn attacks UK for Mandela its planned food ban

and George Parker in London

Germany's agricultura minister said yesterday the UK'e proposed ban on the import of certain animal parts at its borders and ports would be an infringement of European Union law.

Jochen Borchert led a series of attacks by EU ministers following Britain's decision on Monday to ban "specified risk materials" (SRMs), mainly the brains and spinal cords of cattle, sheep and goots.

The prohibition is due to take effect from January 1 as part of the UK's fight against mad cow disease. Mr Borchert said it was "legally unjustifia-ble" and asked the European Commission to examine a possible infringement of single

Fernand Boden, farm minister of Luxembourg, which holds the rotating presidency of the EU, said he and his fellow ministers were not pleased to hear of the UK ban. On Monday, the EU ministers agreed to postpone implemenday, the officials said the mate-tation of an EU-wide prohibiral had to be removed before

"We have always said we should not go it alone over food safety and public health. We have to work together to restore confidence in beef." Mr

The UK ministry of agriculture insisted the UK had acted iegaliy, since it was simply implementing Commission proposals three months earlier than other member states.

Jack Cunningham, Britain'e agriculture minister, flew back to London to face protests have been hit by the BSE crisis and a soaring pound. He will attempt to pacify them by offering additional subsidies to hill farmers, who have suffered the greatest fall in incomes this year.

It emerged yesterday that the proposed UK ban would be more onerous than the government had suggested. On Mon-day, officials said SRMs could be removed from imported cattle, sheep and goat meat after they arrived in the UK. Yesterthe meat arrived in the UK. already had similar laws.

Franz Fischler, EU agriculture commissioner, said his officials would be examining the UK ban to see if it infringed EU legislation. He said the Commission had no legal objection to an earlier UK decision to ben beef on the

The Conservatives, the main UK opposition party, said they would opposa Mr Cunning ham's plan to ban beef on the bone in the UK on the grounds to a minuscule health risk.

Elsewhere, Mr Fischler said restrictions on EU meat and animal imports announced last week by the US were unjustified and, because they had been implemented without consults. tion, did not comply with

He said he did not think the US's stated motive of protect-ing health could "be the valid basis for taking the decision".

Benefit of the doubt, Page 8

US to oppose proposal for big increase in IMF funds

By Gerard Baker in Washington

The US will oppose a proposal by Micbel Camdessus, the managing director of the International Monetary Fund, for a big increase in IMF resources, when the fund's board meets to consider the plan today.

Robert Rubin, the US Treasury secretary, said proposals for additional funding. approved by the board earlier this year, would prove sufficient to meet immediate financing needs. "Once they are put in place, the IMF will have adequate funding," he said.

The opposition of the US, the fund's largest board member, wili almost certainly ensure that the IMF plan will have to be shelved. On Monday, Theo Waigel, the German finance minister, sald Germany, the third largest board member, also thought the proposal was premature, and other European countries seem likely to oppose the plan.

At the IMF's annual meeting in September the US backed measures to increase the fund's quotas - subscriptions from member countries - by 45 per cent, or about \$100bn, and to implement a new borrowing facility to enable the IMF to deal with emergencies such as the Asian crisis. But Mr Camdessus will argue at today's meeting that the quota increase needs to be raised to

between 70 and 80 per cent -

an extra \$60bn - to take account of changed financial

circumstances. Although officials acknowledge the Asian crisis of the last six months has weakened the IMF's funding base, the Clinton administration le heavily constrained by domestic political bostility to

increased contributions. Congress last month blocked \$3.5bn in US contributions to the so-called New Arrangement to Borrow, and have yet to consider the initial proposal to increase quotas by 45 per

cent. Officials had been expecting a tough fight to persuade hostile congressional Republicans to agrea to the plans when they return next month, and President Bill Clinton last night urged Congress to

approve the money. Leading Republicans yesterday lined up to condemn tha IMF's proposal, "I do not believe that a huge quota increase will be well received by the US congress," said Jim. Saxton, chairman of the Joint Economic Committee, who called instead on the IMF to raise private funds.

There is no reason why the who are suffering the cons quence of their own mistakes, said Ron Paul, a Republican member of the House Banking

vents ANC rage at white privilege

Nelson Mandela revealed the depths of black frustration after more than three years in power in his least conciliatory speech as president of South Africa yesterday, which is

The five-hour speech, marking his retirement as president of the African National Congress, showed mounting anger at white attitudes, bitterly criticised the media, attacked mainly white political parties and demanded a fairer distribution of capital.

Mr Mandela was particularly harsh in criticism of whites fighting to prevent change. He transforming society had been relatively slow, the real strength of the counter-offensive seeking to maintain white privileges had not yet been

"However, the desire to maintain those privileges has been demonstrated consistently since our last conference in 1994," be said.

The president took long breaks while delivering during the speech, prompting specula-tion as to why such a demanding task was placed on the shoulders of a 79 year old just 24 hours from retiring as presi-

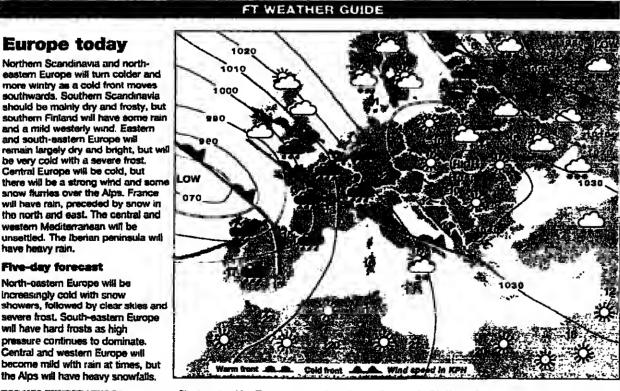

His former wife, Winnie Madikizela-Mandela, who may seek nomination for deputy president of the party, received a huge cheer from the 3,000 delegates as she took her place on the platform.

Mr Mandela said the mainly white political parties, sup-ported by the media, had been most vigorous in opposition whenever legislative and executiva measures had been introduced "seeking to end the racial disparities that continue to characterise our society".

He said there was serious resistance to reforming tha American taxpayer should be public service, and counterbailing out people overseas revolutionary forces were waiting for a moment of weak ness to act decisively against the democratic eystem. Tha National party was denounced as being interested only in defending white privilege.

Mr Mandela said the private sector had to understand "that the perpetuation of the apartheld patterns of economic own erable and control constitutes a recipe for an enormous social and political explosion".

In terminology, rarely, it ever, used previously by Mr Mandela, be declared the country "must secure an acceptance and sctualisation of the proposition that while capital might be owned privately, yet there must be an institutionalised system of accountability for the owners of capital".

THE LEX COLUMN

Joyless Japan

Three questions need to be asked or the much-leaked Japanese fiscal cial system, will it revive an economy teetering on the edge of recession, and will it arrest the crisis of investor and consumer confidence? Short term, it can hardly help but offer some relief. The Y10,000bn (\$76bn) financial stability package, in particular, will take the pressure off beleaguered institutions. Likewise, a Y860bn package of tax cuts will certainly provide an economic

But it still looks like the familiar tale of too little, too late. The stabilisation package is well conceived: using public funds to protect depositors and the financial system is uncontroversial. But there is a loop-hole that might yet allow funds to filter through to weak banks. And with implementation probably still two months away, the risk is that imported problems, possibly from Korea, will overtake the package.

More bothersome are the tax cuts. Not only are they too small, falling well short of reversing the fiscal retrenchment announced in April, but they are misdirected. Japan is suffering from a slump in consumer demand. But instead of encouraging consumers to spend soms of their buge pile of savings, the govern-ment has targeted tax cuts on corporate Japan. Short term, the stabilisation package is probably enough to prompt a rally in financial stocks. But with the government still underestimating the gravity of the economic downturn, the worst probably still lies ahead.

Chase Manhattan

There is nothing like keeping your options open. Following yesterday's management changes. Chase Manhattan has no fewer than six vice chairmen to choose from when current boss Walter Shipley retires in three years time. More worryingly, the strategic direction of America's largest bank looks as opaque as its succession plans. It is an open secret that Chase

wants to play in the investment banking superleague. To do so, it needs to acquire a serious presence in equities: buying anything smaller than PaineWebber, Donaldson, Luikin & Jenrette or, best of all, Merrill Lynch would not satisfy the needs of its global cliants. Chase has the resources for a deal this size, but has so far - quite being demanded. Nor is it clear that index. And the rand has fallen hy

the combination of traditional commercial and investment banking really works. Both Barclays and NatWest have decided that the returns do not justify the risks. Less glamorous, though potentially more rewarding, would be a domestic deal on the lines of the original Chase/Chemical merger, which produced buge cost savings. Chass could try to become the first nationwide commercial and consumer bank in the US. The snag, once

again, is price. Chase can afford to sit on its hands for now. It is performing well and if a bear market develops it may be able to buy more cheaply. But at some point the lack of strate-gic clarity will impact on its valuation, making the next hig deal that much more difficult.

South Africa

Does Nelson Mandsla's retreat from the frontline of South African politics spell the start of a slow downhill slide for the country? It would be easy to think so. Any successor will struggle to bridge the racial divide with similar success. And his own somewhat truculent comments yesterday are a reminder thet racial tensions remain close to the surface. Coming hard on the heels of Zimbabwe's recent policy disasters, they strike a particularly discordant note.

Still, the reality is unlikely to prove so bleak. Mr Mandela's enor-mous reputation did not translate into an investment bonanza. Since he took office South African shares have risen 11 per cent, compared with 63 per cent for the UK market sensibly - balked at the prices and 116 per cent for the S&P 500

nearly 50 per cent against the dol-lar. Thabo Mbeki, his successor, may prove better news for investors. He will be under huge pressure to daliver black upliftmant rather than appease business and investors with fiscal rectitude But his willingness to take soma of the hard decisions Mr Mandela shirked augurs well. And the government will be less able to hide behind the

skirts of Mr Mandela's reputation. Compared with other emerging markets. South Africa's growth record has been stodgy. But amid current turmoil, solid financial institutions, transparent earnings and cound regulatory structures suddenly look a whole lot more

Before cracking open the Hooch in celebration, shareholders should question whather Bass's plans to hand them back some £850m (\$1.4bm) go far enough. When set against the proceeds from its recent slew of disposals - £279m for its Gala bingo business and £564m for around 1,400 mostly tenanted pubs - a handout of this size will not tighten up the company's balance sheet significantly. Furthermore the company might soon sell its Coral bookmaking business. If it went for 16 times 1997 operating profits - the same multiple paid for William Hill - it would realise around £400m. So the pressure on tha undergeared company to make a big acquisition will only grow.

Bass could afford to pay around £2bn and still cover interest payments four times. The danger is, of course, that Bass may end up overpaying. In hotels, a slowing in the build-up of new franchisees in the US is holding back growth. This puts the onus on Bass to deliver its strategy of expanding in continen-tal Europe and Asia. Most likely, it will search for something like Granada's Meridien or Salson's Inter-Continental chain. Its other options to pump money into its managed pub business or brewing - offer less attractive growth prospects.

Now trading at a small discount to the market, Bass's shares have benefited from tha same defensive plays that have pushed up food retailers. But if it splurges on an over-priced European acquisition, it will not only be the alcopops that make shareholders sick.

ply increases the competition for a long-term successor to Mr Shipley or Mr Labrecque.

Donald Boudreau wins a powerful new position as head of Chase's global consumer operations. He will also be e member of a new nine-member executive committee that will co-ordinate corporate strategy. Mr Boudreau's responsibilities will include all the bank's credit card and consumer lending operations, as well as its large retail branch network in the oorth-east US. Michael Hegarty, who had previously

sor to Walter Shipley, the others said the reshuffle sim- been in charge of its US regional banking operations, is leaving the company. Other members of the execu-

tive committee include Wiliiem Harrison, who heads Chase's giobal bank, Donald Layton, who heads global markets, James Lee, who runs global investment banking, and Marc Shapiro, who runs finance and risk management. In a statement, Mr Shipley and Mr Labrecque said they would look to this team for "future top management lead-ership of the corporation". The new structure is intended to

stay in place for at least the next three years, until Mr Shipley's likely retirement. The reorganisation also

increeses the importance of technology, particularly in the bank's retail operations. Denis O'Leary, formerly chief information officer, has been given responsibility for consumer product delivery, including electronic delivery channels. and will serve on the executive committee. Jospeb Sponholz, who is heading a division that will combine Chase's information technology and operations with its moves into electronic commerce, will also serve on the committee.

Doug Dunn, head of Philips Electronics' newly reorganised consumer division. Please Lyde van der Mont

Philips prepares for battle

By Gordon Cramb in Eindhoven

Philips is to develop more products as potential winners, price existing lines aggressively and increase spending on marketing as part of e plan to reassert itself in consumer electronics worldwide.

After more than a year of cuts and closures, the Dutch group yesterday pronounced itself in shape to renew battle with its mainly Far Eastern competitors in the market for market and an investment high-volume goods such as location in spite of the area's from the current level of

television sets. Doug Dunn, head of a newly reorganised consumer division accounting for as much as a third of group sales, said: "We have charted out the path for Philips for the future. We have quite strenuously reconfirmed our commitment to the broader consumer market."

In the first discussion on future strategy hy a senior executive since the toughtalking Cor Boonstra took over as Philips president in October last year, Mr Dunn rejected any idea that the group should ebandon an established product range because the value

added was low. "It will not make me embarrassed if they are called commodity products. We make money on them."

Philips is to target Asia economic upheavals since this autumn. "We are going to invest heavily in China," said Mr Dunn. Impact on group finances from a fall-off in regional consumer demand

was "not discernible yet". Shares in Philips, et Fl 114 yesterday, are 36.2 per cent below their early October peak, Although their value is still double that when Mr Boonstra took office, they have been weighed down by worries over the outlook for Asia.

Mr Dunn ecknowledged that electronics manufacturers in countries such as South Korea would try to sell their way out of trouble by discounting. But he added: "Price erosion is caused by companies like Philips. It is part of our strategy.

We will compete on price." It plans to lift promotional spending across its markets roughly 3.5 per cent of revennes and ally itself more closely to multimedia breakthroughs. "Philips is determined that it is going to be the leading player in this new wave of products," Mr Dunn said.

Daimler to sell Temic to Vishay for \$500m

By Graham Bowley

Daimler-Benz, the German motor and industrial company, is to sell its Temic semiconductor business to Vishay Intertechnology of the US for about \$500m.

The sale, which was widely expected, marks the latest step in Daimler's strategy of selling off peripheral activities m order to concentrate on its core transport businesses

In June, Daimler, which is restructuring its businesses after suffering record losses in 1995, sold its stake in Cap Gemini, the big French soft-

Daimler will retain the more successful antomotive elec-tronics business which is also part of Temic Telefunken, its microelectronics division. Vishay Intertechnology, the electronics components manufac-turer, is based in Pennsylvania and has 17,000 employees. The acquisition wiii almost double Vishay's size in terms of sales, which stood last year at DM1.9bn (\$1.1bn).

Eckhard Cordes, Daimler board member, said: "Daimler-Benz continues its strategy to focus on businesses directly related to transportation prodncts, systems and services."

Daimler had signalled that Temic was up for sale. The division made a ioss in 1996 but is now profitable, Daimler said. "We discussed a sale with three parties, but decided Vishay was the best fit. We will keep the antomotive electronics business which is profitable," said the company,

The Temic semiconductor unit employs 6,700 people, 2,000 of whom are based in Germany. It also has plants in France, the UK, Austria, the US, the Philippines, Taiwan and China. Sales this year are expected to be around DM1.5bu - more than half of which will be in Germany. In the US. Temic operates Siliconix, the computer chip manufacturer, based in Santa Clara, California.

Felix Zandman, Vishay chairman, said the acquisition positioned Vishay "as the broadest worldwide manufacturer of discrete electronic components, passive and active, as well as a manufacturer of integrated circuits". It follows Vishay's acquisition of 65 per cent of Lite-On Power Semiconductor, the diode Hungry animal, Page 22 | manufacturer, of Taiwan.

affliated corporations.

Value investors wait for the return of normality

Street - taking the S&P 500 Index. although not the Dow. to a new all-time

this month - has further inflamed the wounds of the overseas managers who have been so underweight in US equities all year.

At the risk of repetition, it is worth setting out once again why London's global managers have been so sceptical of Wall Street in the 1990s. But more fundamentally, what 1997 has shown so clearly, not just in the US, is that whan value managers lose control of their markets they can flounder for

extended periods. Investor ettitudes were formed in the 1980s when the US stock market was the worst performing of the major global markets. The US was written off by many foreigners as slowgrowing and inefficient, albeit with an interesting technology

The second important factor from the late 1980s was that London came to believe in its Index return by i80 hesis talents for market timing. Its managers than correctly judged that Japan's stock market was a bubble that would predictably burst.

Value-based market timing the All-Share back to within 3 clearly added return compared with strategies driven more by capitalisation-based weights, based global managers at the

Between 1989 and 1993 the everage UK pension fund, in

tic London managers have taken the eame value-based visw of Wall Street. Their successful Japanese strategy, they calculated, could be profitably repeated for the US. They have progressively sold down US equities and waited. They are still waiting. And waiting, It looks as though the average UK pension fund'e overseas equity portfolio will underperform the World ex UK Index by around 10 per cent in 1997. The problems are also quite

Attitudes were formed in the 1980s when the US was the worst performing of the major markets

severe for UK pension funds in their own domestic market. As I pointed out last week, they underperformed the All-Share points in the first 9 months. Some of this was clawed back in October and November, but December's market rally, which by last night had taken per cent of its high, has wreaked havoc again.

Normally, the UK institualmost exactly in line with the All-Share, not surprising when they own around half of it. its overseas equity portfolio, year's anomaly, though, is that years like 1997. The wait conbest the World ex UK index the pension funds have been tinues.

latest total return by 6 per cent a steadily selling UK equities.

On Wall year.

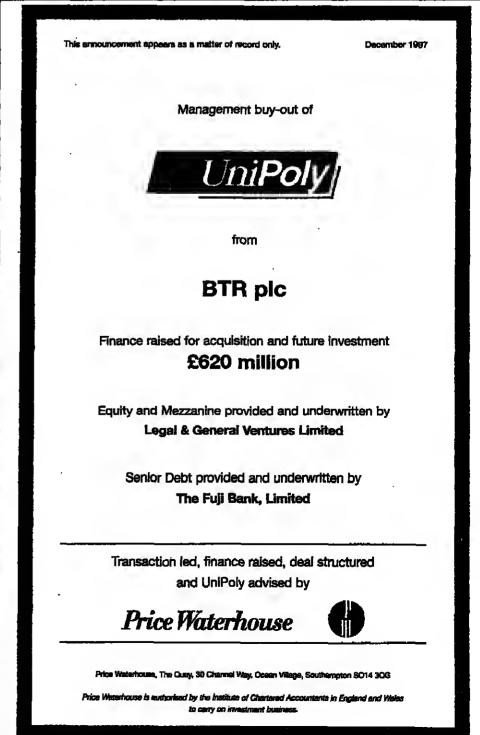

Funds in the WM All Funds taking In the late 1990s the hubris
Universe (about 75 per cent of the whole sector) disposed of UK equities worth 23.7bn (\$6.1bn) in the third quarter, for instance. In doing so they have lost control of prices.

As Philip Isherwood, strate-

gist et Dresdner Kleinwort Benson, points out, UK pension funds have become pricetakers, not price-setters. They have been replaced by new marginal investors, mainly USbased funds and corporate buyers. Such investors are not driven by conventional portfolio managare' attitudes to investment value. The Americans have chased up the prices of global blue chips in sectors such as pharmaceuticals, banks and (until a global economic slowdown loomed) olls. As for the corporates, the bids for MAM and Redland alone are soon to pump £5bn in cash into the UK equity market, and buybacks are important too (with Bass announcing the return of £850m yesterday). That rate of cash injection promises more discomfort for the bears who pay more attention to values than to investment flows.

But who would want to set prices when they are out of line with rational underlying values? It makes sense that long-term investors should back off when markets get out of line. The assumption is that one day the marginal buyers as were often favoured by US- tions in aggregate perform will disappear and traditional investors will regain control.

All the same, UK pension fund managers will not want What has helped create this to live through too many more

CSFB close to **BZW** Asia deal

Credit Sulsse First Boston, the investment bank, is close to finalising the acquisition of parts of BZW Asia, the regional investment banking arm of Barclays of the UK, Hong Kong banking sources said yesterday.
Officials at CSFB and BZW Asia said the negotiations

concerned "selected parts of BZW Asia" but they declined to comment on the financial terms of the planned deal. BZW Asia has said it hoped to conclude a deal by the end of the year. The businesses to be sold include the company's equity capital markets division, equity derivatives, and mergers and acquisitions. CSFB is thought to

be interested in BZW's investment banking operations in Singapore, Hong Kong, Taiwan and the Philippines. The sale of the BZW businesses comes amid a broader restructuring of the Asian investment banking industry. partly prompted by the financial crises in the region. The past few weeks have seen a number of acquisitions in the sector and job cuts as banks respond to the sharp downturn in business, Neither BZW nor CSFB would commen on the implications for staff numbers. BZW Asia, which does not include the bank's Japanese or Australian operations, employs 700-800 staff across the region. CSFB has about 1,400 staff in Asia, excluding Australia.

BZW's Australian operations are being sold separately. ABN Amro of the Netherlands is close to a deal and an

mouncement is expected before Christmas. CSFB said yesterday it would acquire the 75 per cent of First NZ Capital that it does not already own. Stephen Stonefield, chairman of CSFB Asia Pacific, said the move would enable the company to integrate fully the New Zealand investment bank into its operations.

John Ridding, Hong Kong

■ PETROCHEMICALS

Thai Olefins seeks payments halt

Thai Olefins, the petrochemical company controlled by the state-owned Petroleum Authority of Thailand (PTT), is seeking to halt principal repayments on \$400m of loans

bankers said yesterday.

The company joins the growing list of Thal corporates that have sought to restructure their debts since the devaluation of the Thai baht in July. TPI, Thailand's largest petrochemical company, which holds a 6.8 per cent stake in Thai Olefins, has already halted principal repayments on \$4bn in debt_

That Olefins' debts are primarily owed to two creditor syndicates, a domestic one led by Krung Thai Bank and a foreign one led by the Industrial Bank of Japan. Thai Olefins is being advised on its debt restructuring by Chase Manhattan Bank.

Officials said the company would run out of working capital by the middle of next year if it had to repay the debt on time. PTT, which owns 49 per cent of the company, cannot inject more capital without similar injections by minority shareholders or it would become a Ted Bardacke, Bangkok state-owned enterprise.

WHAT'S BEHIND BARCLAYS CAPITAL?

SFB close to

Two things really. The first is Barclays with its outstanding reputation, its AA credit rating and its long experience in international financial markets.

The second is capital. The access we have to a balance sheet of over \$350 billion gives us the financial muscle to support our clients in many different ways.

But the real leverage lies in combining the two. Barclays Capital is focused on integrating the full array of debt, lending and risk management products to provide innovative solutions for our clients. This is what makes us different and represents an altogether new approach to investment banking.

Still international and still very much in the business of providing financing advice. But through a greater concentration on debt and risk management products, we can better understand what our clients need and so provide them with an even better service.

After all, that is what's behind Barclays Capital.

gry animal that needs feeding more and more." The analogy comes not from a critical stockbroking analyst but from Jan Oosterveld, the company's senior director for corporate strategy. He has just finished co-ordinating a review of its outlook in highvolume electronics.

that "growth is paramount" and that a market sbare below 10 per cent in any country or region makes profits difficult. Far from focusing on specialised highend Items, Europe's biggest consumer electronics group needs further volume growth in markets such as the US and eastern Europe as well as currently troubled east

The alternative is "conunpleasant and costly". That messy business has been Mark Browne, of SBC Warpreoccupying board memburg in Zurich, described the bers of the Dutch-based group, and unsettling its staff, for the 15 months since executive initiated a programme of disposals and internal rationalisations designed to reverse a slide

public discussion of strategy until well into next year, once structures and controls had been revamped and, in Mr Boonstra's words, the "bleeders" in the business had been shed. He pledged himself foremost to shareholder value, But with much of his early agenda accomplished, he has faced a renewed slide in the Philips stock price. Having trebled since he took over, it now

stands at double, Still to be made clear is the overall corporate vision and ultimate product portfolio of a group which spans semiconductors, computer monitors, lighting, tele-phones and domestic appliances as well as audio-visual products and software.

But consumer electronic bardware represents a third of revenues, which reached stant restructuring, which is F169.2bn (\$34.6bn) last year, and Mr Boonstra himself chaired the review he describes as "one of the most critical elements of the process of change".

Profitability had not come Cor Boonstra took the helm. 'in proportion to its sales; The former Sara Lee foods and its Sound & Vision unit making TV sets and video recorders was a principal lossmaker. Now it is back in the black and Doug Dunn, its head, was recently given of Mr Dunn. At the same

There was to have been no wider responsibility for a time, though, the converconsumer products group including mobile phones and computer peripherals.

Mr Dunn says operating margins are back above 3 per cent and the return on net assets meets Mr Boonstra's 24 per cent requirement. At the same tima. though, annual erosion in the selling price of its products is deepening, at about 7.5 per cent this year compared with 5 to 6 per cent in the recent past.

The division is now robust enough to withstand this and even to lead a price-cutting trend when it chooses, maintains Mr Dunn, who blames competition in Brazil rather than south-east Asia as the source of the worst downward pressures in recent months

hilips intends to main-tain the 7 per cent of sales it puts towards consumer electronics research and development, and increase its marketing commitments, currently half that proportion. At ING Barings, Steven Vrolijk says that, worldwide, "the sale of ordinary TV and video products will still be the domi-

That is central to the plans

gence of audio-visual, communications and computing functions - brought about by an industry shift from analogue to digital standards - means the division should become more closely attuned

to Silicon Valley. Philips ventured before into computers, and retreated. Mr Dunn says there is no appetite to return to "boxes on a desk". But wben a boma audio-visual system centred around a television screen can offer not only sound and pictures but connectivity - "Do you call that a PC? I don't know.

What is clear is that Philips intends not to centre product development on one big idea. This led to past disappointments over the V2000 video system, laser disks, and the digital compact cas-sette and CD-interactive formats. "We are talking about 10 different big concepts at a time, instead of one."

Over-optimistic growth expectations cost Philips Fl 1.5bn last year, warns Marcel Meize, author of two books on the company. The hunger for expansion within its product divisions remains. Mr Boonstra will have to temper the diet.

Solid Capital Markets has become the first Israeli stock-broker to be granted a licence by the UK anthorities to operate in London. The move is expected to lift the profile of Israeli stocks in Europe. Most of Israel's 657 public companies are listed on the Tel Aviv Stock Exchange, which suffers from a lack of liquidity, while a further 99 companies, mostly high-tech groups, have opted for a New York listing. Market capitalisation in Tel Aviv is US\$47bn. Foreign investors account for 13 per cent of trading on the Judy Dempsey, Jerusalem

AUSTRIA

Wolford profits drop 25%

Shares in Wolford, the Austrian maker of luxury tights, continued their year-long slide yesterday after manage-ment announced a 25 per cent drop in pre-tax profit to Sch119m (\$9.5m) for the six months to October. The stock once a strong performer on the Vienna exchange, dropped Sch71 to Sch763 and is now trading at almost half its peak n late January.

Fritz Humer, chairman, blamed the decline on the high costs of expansion and predicted a better result for the second half. Net income should remain around the Sch191m recorded for the year ended April 30. First-half group sales were steady at Sch830m, as growing demand in the US and Asia offset a 10 per cent drop in Austria and Germany, where a warm autumn damped customer

HAT BROUGHT THEM TOGETHER? THE BIRTH OF A STOCK MARKET.

WHAT KEEPS THEM TOGETHER? THE BANK OF NEW YORK.

In January of 1996, under the winter skies of Moscow and New York, Vagit Alekperov and Dr. Betty Tihbs took their place in history. Three thousand shares of Lukoil changed hands in U.S. markets for the first time ever. The desire to invest in Russian oil and the open-market forces of perestroika had finally converged. • Since then, dozens of Russian companies have accessed money from overseas capital markets through a tool called the Depositary Receipt Trading like a stock, the Depositary Receipt has helped bring Russian issuers and foreign investors together across a once historic divide. . The bank selected to make this happen: The Bank of New York. . Today, thousands of clients are using The Bank of New York to create, maintain and enhance relationships with their investors in more than 60 countries. In Russia, Lukoli Chairman Vagit Alekperov and investor Dr. Betty Tibbs are just one example. . In custody, corporate trust, funds transfer, securities lending, global risk management and depositary receipts, you'll find a solution at The Bank of New York. Visit us at www.bankofny.com/adr

AMERICAS NEWS DIGEST

Lincoln National incurs charges

Lincoln National, the Indiana-based life insurer, yesterday announced two special charges against fourth-quarter results. They will cover charges incurred as a result of mis-selling pensions in the UK and to strengthen reserves for claims on some personal accident reinsurance policies written in the Loodon market by its reinsurance arm. However, the two charges were balanced by confirma-tion Lincoln National would realise a gain of \$777m after tax on the sale of its stake in American States Financial

quarter net income by \$490m. It said a charge of \$173m had been taken to cover its liabilities for misleading UK consumers, and persuading them to contract out of employers' defined benefit pensions schemes. Pre-tax charges of more than \$41m had been taken against earnings over the last five years, but the company said recent settlement experience suggested they needed a further substantial strengthening of reserves. It took an after-tax charge of \$114m on its rein-

earlier this year. The total impact is to increase its fourth

surance operations.

Provisions hurt Donnelley

R.R. Donnelley, the Chicago-based printing and information services group, is to take charges of \$171m in the fourth quarter. It is to write down and sell some "nonstrategic" assets, and restructure its ownership of Stream International, the software services business. Stream was formed when Donnelley merged its software operations with those of Corporate Software two years ago. Donnelley said it intended to convert its debt and equity bolding in Stream into 87 per cent of the company's common stock. Stream will go ahead with an initial public offering. and Donnelley's interest will be cut to under 50 per cent at that stage.

Westmin raises Chilean reserves

Westmin Resources, the Canadian zinc and copper pro dncer that has rejected one takeover offer but invited others, said yesterday its Chilean copper reserves totalled 7.4bn lb, almost double the previously announced figure. The announcement appeared to have been timed to bolster Westmin's position against a recent \$530m bostile bid. Westmin has rejected as too low an offer by Bollden, the Toronto-listed company spun off earlier this year by Trelleborg, of Sweden. The company has said its C\$530m (US\$373m) market capitalisation does not reflect the potential of Westmin's Chilean reserves.

Ford warns of trade | RJR Nabisco revamps risk from low yen

By Haig Simonian in London and Richard Waters in New York

Ford Motor warned yesterday that an intensification in Japanese competition because of the low yen could trigger a return to acute trade frictions with Tokyo.

Alex Trotman, Ford chairman, said: "We're going to feel more and more pressure in western Europe and the US in 1998. The tension in trade relations will definitely build."

He warned that rising competition from Japan could prompt further increases in already high levels of marketing incentives on new vehicles in the US next year. However, he hinted that Ford would not allow imports to erode its sales. "We'll have to do wbatever it time next year.

takes [to hold on to market share] ~ but I expect times to get more challenging if the yen stays at 130 (to the

dollarl or gets weaker." Despite the added pressures, Mr Trotman said Ford could potentially improve North American profits

next year. US demand for cars and light trucks - the decisive factor - should equal the 15.5m vehicles expected to be sold this year.

Ford would be helped by the continuing popularity of sports utility vehicles, pick-up trucks and multipurpose "people carriers". Mr Trotman said such vehicles, which offer higher margins than passenger cars. should account for more than 50 per cent of sales in the US for the first

COMPANIES AND FINANCE: INTERNATIONAL

Finnish oil and power groups to merge

By Greg McIvor in Stockholm

Neste, the partly-privatised Finnish oil and petrochemicals group, and Imatran Voima (IVO), the stateowned power utility, are merging to form a powerful

new alliance on the deregulated Nordic energy market. The Finnish government which holds stakes of 83 per cent and 95.6 per cent in Neste and IVO, respectively yesterday said the tie-up would improve the competi-

power market.

The merger, one of Finland's higgest corporate deals, creates a group with combined annual sales of FM55.4bn (\$10.4bn) and 16.000 employees.

It follows a six-month, government-led strategic review aimed at finding ways to improve co-operation between the companies. The tie-up requires approval from the Finnish parliament and the Euro-

energy industry in the rap-idly liberalising European cern about the domination Brussels has voiced conthe combined group would have over the Finnish natural gas market.

> between Neste and Gazprom. the Russian gas giant, is the sole importer and distributor of natural gas in Finland. IVO is the country's domi-

nant power generator. Neste said it would tackle Brussels' reservations by selling part of 75 per cent holding in Gasum, leaving it with only a minority stake. national extension of the Gasum would also stay

outside the merged group. IVO will form a joint holding company. The partners will operate as separate divisions Gasum, a joint venture but co-operate in various

> fields. The prime focus will be on developing a common energy business. This will involve investments of between FM10bn and FM12bn, chiefly in natural gas projects.

> Planned spending includes construction of gas-fired power plants and the internatural gas grid.

them to exploit Finland's potential as an international hub for Russian gas supplies to the Nordic and European markets.

They said co-operation would also extend to marketing, research and development, engineering, plant to FM127. operation and maintenance.

The holding company. which is to be headed by Heikki Marttinen. IVO chief executive, will be floated on the Helsinki stock exchange. The Finnish government

outside the merged group.

The companies hope the indicated that it would private the deal, Neste and link-up will better enable vatise part of its stake in the merged concern.

According to the proposal. the government will offer Neste shareholders shares in the new company in exchange for their stake in

Robert Fleming expands in Egypt

By Mark Huband in Cairo

Robert Fleming Securities' Egyptian snbsidiary yesterday becama the country's fourth largest brokerage with the purchase of El-Rashad Securities. The move will further concentrate brokerage in the hands of the market leaders.

Fleming Mansour, established stalt, and Bank Austria Creditan- from the government in January and September as an asset management and investment banking joint ven-ture with one of Egypt's largest privately-owned companies, bought in El-Rashad, to sell its 20 per cent privately-owned companies, bought in El-Rashad, to sell its 20 per cent 99 per cent of the shares in El-Ras-stake in the new company's rival had, which has 4 per cent of the

Egyptian brokerage market. The move is the first of its kind since international companies began seeking local partners in Egypt. The new company, to be called Fleming Mansour Securities, aims to become the main competitor to Egypt's leading brokers. EFG-Hermes and Intercapital Securities each control up to

25 per cent of the market.
Fleming Mansour will look to increase its market share to about 20 per cent, in a sector in which 126 brokerage companies operate.

ued at EP1.2bn (\$353m) this year, and enjoys a reputation for transparency in what can be an opaque market.

For Fleming, the deal is a first step towards creating a region-wide brokerage operation which it expects will extend into other North African

markets and the Middle East. Pressure is now mounting for the in a number of media Intercapital Securities, of which it

"There'e a big conflict of interest and we will ask them to exit the partnership," said Ahmed El-Helw, Intercapital managing director. ING Barings, which has a 30 per

cent stake in Intercapital, had considered buying the Mansour shares, for which 12 outside offers have been made. However, it appears likely the shares will be bought by Commer-cial International Investment Company, which already has a 80 per cent stake in Intercapital.

Fund aims at LatAm media

By Raymond Colitt in Caracas

Hicks, Muse, Tate and Furst, the Dallas-based investment firm, and Venezuela's Cisneros Group, a media and telecoms conglomerate, yester. day announced a \$500m fund to invest in media properties in Latin America, Spain and Portugal

The Ibero-American Media Partners fund, which is to focus its investment activities on television and radio broadcasters as well as Spanish and Portugueselanguage programming groups, aims "to form the first pan-Ibero American media network".

reger d's iPOs of

Apple and the second

The fund could grow to \$1bn or more, the Cisnero Group said, as limited equity partners joined or either side injected additional capital.

The fund would also consider leveraged acquisitions. Gustavo Cisneros, chairman of the Cisneros Group of Companies, said the joint venture "will allow us to continue an aggressive campaign of investment in Ibero America".

Cisneros hes stakes in media companies in Venezuela, Argentina. Chile, tha Caribbean, and in Univision, the leading Hispanic television network in the US.

Hicks Muse has holdings companies, including Chancellor Media Corporation and Capstar Broadcasting Partners, the second and fourth-largest radio broadcasters in the

It also bas a stake in Multivision, a leading media company in Mexico.

In October Hicks Muse agreed to acquire Lin Television, an owner and operator of several US television stations, while last mooth it acquirad United Artists Theatre Group, the second largest operator of cinemas in the US.

Through the first 11 months of 1997, J.P. Morgan managed three of the top ten initial public equity offerings by U.S. issuers, and was the fourth-ranked lead manager for IPOs of all sizes. Issuers choose J.P. Morgan to be bookrunner on their IPOs because they know we offer more.

More emphasis on developing long-term shareholders, not short-term investors. As a result, as the chart indicates, more stability after the issue has been launched. More access to a unique group of sophisticated high net worth investors, and through a special arrangement with Charles Schwab & Co., Inc., access to an extensive national network of active retail accounts.

No firm works harder than we do to make our clients' offerings successful. For more information about how we can help make your IPO a success, please contact your J.P. Morgan relationship manager.

COMPANIES AND FINANCE: UK

Warning of job cuts in US as sales fail to reach targets

Danka shares tumble 57%

By Charis Gresser

Shares in Danka Business Systems, the photocopier distributor, collapsed yesterday from 510p to 217%p, a fall of 57 per cent, as the company warned it would fail to hit sales targets for the third

This is the second shock the company has delivered to the market in 18 months. In summer last year, the shares fell 28 per cent in one day on a profits warning. At their peak in May 1996 the sbares traded at 835p, a ten-

fold increase in four years. Yesterday, the company said revenue for the third quarter was expected to be £30m (\$49.5m) short of its projections. Analysts down graded their annual profit were \$25m below forecasts.

Share	holders
to get	£850m
from l	Bass

By David Blackwell

Bass is to return £850m (\$1.4bn) to shareholders next year following its second big disposal this week. The figure represented about 11 per cent of the group's equity at Monday's close.

Yesterday, the brewing and leisure group sold the hulk of its tenanted pub estate - more than 1,400 pubs - to a private venture for £563.7m cash. The deal followed Monday's £279m sale of its 130-strong Gala chain of bingo clubs.

Two food retail antrepre-neurs are behind tha pub purchase - Hugh Osmond, a founder of Pizza Express, and Roger Myers, who built up Pelican Group, which owns Cafe Rouge, before selling it to Whitbread for £133m last year. Both are investing several million

They are backed by BT Capital Partners Europe, the private equity arm of Bankers Trust, which said it would probably consider flotation in two or three years. Bankers Trust and Morgan Stanley are providing £455m of senior debt, including a revolving facility.

The:deal puts Mr Osmond among the leading operators in the tenanted pub sector. Last month, Grovebase Proprties, which is backed by Mr Osmond and other private investors and is solvised by Morgan Stanley, paid about £150m for 845 pubs from Phoenix Inns, owned by Nomura, the Jspanese

investment bank.

Nomura itself was among contenders seeking to huy the Bass tenancies, but it is understood to have offered £100m less than Mr Osmond's venture.

Mr Osmond said his combined pubs would be buying half a million barrels of beer a year. In the short term, however, tha companies would be kept separate as the Phoenix pubs were not tied tenancies.

His team would look at the Bass tenancies from the point of view of operators rather than landlords Between £10m and £15m had been set aside to offer tenants help with investment to drive their businesses forward.

Sir Ian Prosser, chairman of Bass, said the group's focus had shifted on to the branded sector of the pub business. The company would remain financially extremely strong after returning the cash to shareholders, and would still be capable of spending up to £2bn on an acquisition.

Analysts said Bass had obtained a full price for the pubs, but the share huy-back suggested no acquisitions were imminent. "Bass is good at selling things but not very good at buying

The pubs included in the deal had a net book value of £441m at the end of September and generated operating profits last year of £67m.

Ex-Volvo chief to chair CU

By Christopher Brown-Humes

Commercial Union, the UK composite insurer, yesterday announced that Pehr Gyllenhammar, the Swedish businessman best known for his 22 years at the head of Volvo, would be its next chairman.

He will immediately become deputy chairman of the group, before succeeding Nicholas Baring as chairman at the annual meeting in April.

The appointment underscores CU's increasingly international culture, with. more than 70 per cent of its business outside the UK.

However, the company dismissed suggestions that It might be seeking to use Mr Gyllenhammar's European contacts to line up a continental merger. "We aiready have a strong European presence," said Mr Baring. He said Mr Gyllenhammar's international experience, in particular his strong European credentials, fitted well with Com-

mercial Union's. Mr Gyllenhammar, 62, aaid the cheirmanship would be his most substantial role since his resignawake of its failed merger with Renault of France in late 1993. He expects to spend at least two days a week at the company, with his other main focus on his work as a senior adviser to Lazard Freres, the merchant bank. He is also a non-execntive of Pearson, which owns the Financial Times.

"I believe I bave been appointed because of my knowledge of the financial world and my international perspective," Mr Gyllenhammar said. Before Volvo. he was chief executive of Skandia, Sweden's leading

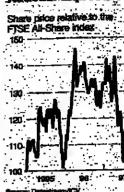

Mr Gyllenhammar's fee is expected to be in line with Mr Baring's, who also works two days a week, and received £120,000 (\$198,000) last year.

LEX COMMENT

Natl Express

National Express has Mational Express emerged from the Monopolies and Mergers Commission pretty much as it went in. After all, the original decision of Margaret Beckett, trade and industry secretary, to overrule the Office of Fair Trading and despatch National Express to the MMC was largely symbolic it was an early opportunity to score political points by showing Labour took the consumer sariously. . National

Express's acquisition of

ScotRail did indeed raise real competition questions. But given that the OFT was already proposing to address these by forcing National Express to sell its small Scottish coach business it was never easy to see quite what else the MMC was meant to look at. That the MMC has anded up following the OFT's recommendation on Scotrail to the letter underlines the futility of its inquiry. Much the same is true of its inquiry into Central Trains. National Express does have a big bus business in the West Midlands, but since the local passen ger authority fixes train times and fares it was always hard to see how National Express could end up fleecing

passengers.

Moreover, launching two MMC inquiries was expensive both for the taxpayer and National Express, whose management suffered a tedious summer and autumn complying with competition authorities. But, longer term, that will be a small price to pay if diversified transport operators can develop their businesses without excessive intervention from the authorities.

NEWS DIGEST

Merrill Lynch has 61% of MAM

Merrill Lynch, the US investment bank, has won acceptances for 61 per cent of Mercury Asset Management, the UK's leading pension fund manager, it announced yesterday.

Analysts expressed some surprise that the group had not received unconditional support - or more than 90 per cent - by Monday's first deadline for its £3.1bm (\$5.11bn) cash offer. But Jane Ageros, director of marketing at Merrill Lynch, said: "We expect it to go unconditional

The bank had also bought some 4.4m shares in the company, making a total bolding yesterday of 64 per cent. Merrill Lynch received acceptances from investors holding 112m shares - or 6L4 per cent of the company.

Cellnet worth less to Securicor

Rising investment and acquisitions by Celinet. the mobile phone operator, are eroding its value to Securicor, the security group, according to analysts.

Neither Securicor, which owns 40 per cent of Cellnet, nor British Telecommunications, which owns the rest, received a dividend this year. Last year, Cellnet paid Securicor £17.3m in dividend. Analysts said the build up of debt within Cellnet, could reduce the value of Securicor's stake from £1.6bn to £1.2bn.

. The suspension of Cellnet dividends was revealed as Securicor announced pre-tax profits for the year to September 30 of £31.4m, depressed by £70m of exceptional items, including a loss on disposals and a write-down on a software project. Last year, Securicor made £107.4m in pre-tax profits. Securicor's share in Cellnet's profits. moved up from £76.6m to £79m.

Two years ago, the Department of Trade & Industry prevented Securicor from selling its Cellnet stake to BT.

First Choice boosts board

First Choice, the UK'a third largest tour operator. yesterday made boardroom changes to strengthen its strategic development capability as it predicted a shake-up in the travel industry next year.

Ian Clubb, chairman, said the imminent publication of a Monopolies and Mergers Commission report into competitiveness in the travel industry was likely to lead to consolidation and throw up opportunities. He spoke as Peter Long, managing director since November 1996, reported a 54 per cent rise in pre-tax

profits to £15.4m (\$25.4m) in the year to October 30, including e net exceptional loss of £6.6m. Exceptional items included a loss of £8.6m for accounting errors. Lance Moir, finance director, is to become director of planning and business development, a newly created job. He is replaced by David Howell, former finance director at Central Transport Rental. Scheherozade Doneshkhu

Black takes Ferrosan UK

Peter Black Holdings is bolstering its vitamins, minerals and health supplements business by acquiring Ferrosan UK from its Danish parent for £35m (\$57.8m).

The purchase, to be financed by a placing, cash and

new borrowing, will double Peter Black Healthcare's share of the £330m a year market for diet supplements to 16 per cent. The market is estimated to be growing at

about 10 per cent a year. Peter Black is raising £18.5m gross through a placing of 5m shares at 370p, arranged by NM Rothschild. The shares rose 71/2p to 389p. Andrew Davis

II buys marine product line

Swiss Re

III

Swiss Reinsurance Company, Zurich

Repurchase of own shares

capital reduction

Swiss Reinsurance Company (hereinafter Swiss Re) is launching a share repurchase programme and plans, in a first tranche, to repurchase its own shares up to a total value of CHF 1,000 million. This is equivalent to just under three percent of its current market capitalisation. This decision was taken at the meeting of the Board of Directors on 12 December 1997. A corresponding capital reduction to the amount of the repurchase will be submitted to the General Meeting of Shareholders of 26 June 1998 for approval. The share repurchase programme underlines Swiss Re's determination to continually and actively manage its capital base.

Second line of trading on the Swiss Stock Exchange

New form of share repurchase

As part of the share repurchase programme announced by Swiss Re, a second line of trading io Swiss Re registered shares will be opened up on the Swiss Stock Exchange. Only Swiss Re may purchase shares in this second line (via the bank mandated to execute the share repurchase), thus acquiring its own shares for the purpose of the subsequent capital reduction. Ordinary trading in Swiss Re registered shares under securities number 124 558 will not be affected by this second line of trading and will continue as normal. A Swiss Re shareholder wanting to sell shares thus has two choices: either sell Swiss Re registered shares in normal trading, or make the shares available to Swiss Re in the second line of trading for the purpose of the subsequent capital reduction. Swiss Re is not obliged to buy every one of its own shares offered in the second line of trading, but will assess marker conditions before making purchases. Sales of shares in the second line will attract Swiss Federal withholding tax at a rate of 35% of the difference between the repurchase price of Swiss Re registered shares and their nominal value. This will be deducted from the repurchase price (= net price).

Repurchase price

The repurchase price, or price of Swiss Re registered shares traded in the second line, will be based on the price of Swiss Re registered

Payment of net price and delivery of securities

Mandated bank

Sale in the second line

Quotation

Statutory stock market obligation

Tax

Conditions of trade in the second line are the same as for any other normal stock exchange trading. Payment of the net price (repurchase

price minus withholding tax on the difference between the repurchase price of the shares and their nominal value) and delivery of the Swiss Re registered shares thus occurs, as is customary, on the third trading day after the transaction. Swiss Re has mandated Credit Suisse First Boston. Zurich to execute the share repurchase. Credit Suisse First Boston will be the sole stock exchange member offering bid prices on behalf of Swiss Re in the second line of trading.

Shareholders wishing to sell should refer to their bank or to the bank mandated with the transaction: Credit Suisse First Boston, Zurich. Registered shares of Swiss Re will be quoted for the second line of trading from 17 December 1997 in the main sector of the Swiss Stock Exchange.

In accordance with the Swiss Stock Exchange ruling in this respect, all second line trading without exception is to be carried out on the Stock Exchange; over-the-counter trading is not permitted. As far as Federal withholding tax and direct tax are concerned, the repurchase of own shares for the purpose of a capital reduction is treated as a partial liquidation of the company making the repurchase. The implications of this for shareholders selling their shares are

1. Withholding tax

Swiss Federal withholding tax amounts to 35% of the difference between the repurchase price of the shares and their nominal value. The company making the repurchase, or the bank it has mandated, will deduct tax from the repurchase price for payment to the Federal Tax Administration. Shareholders domiciled in Switzerland are entitled to a reimbursement of the withholding tax if they are beneficial owners of the shares at the time they are surrendered (Art. 21, paragraph 11 of the Withholding Tax Law). Shareholders domiciled outside Switzerland may claim back the tax in accordance with any applicable double taxation agreements.

The repurchase of own shares for the purposes of a capital reduction does not attract stamp duty (however, from) January 1998 the stock exchange fee and Federal Banking Commission duty of 0.01% will apply).

The following applies to the levying of direct Federal income tax. Cantonal and municipal taxation procedures are, as a rule, the same

as for Federal tax.

a) Shares held as private assets: For shares sold back directly to the company, the difference between the repurchase price and the nominal value of the shares

constitutes taxable income (par value principle). b) Shares held as corporate assets: For shares sold back directly to the company, the difference between the repurchase price and the book value of the shares

This notice constitutes neither a quotation notice as defined by the Swiss Stock Exchange's quotation regulations, our an issue prospectus as defined in Art. 652a and 1156 of the Swiss Code of Obligations.

Argentina taps local market for \$2bn loan

By Ken Warn in Buenos Aires

Argentina has secured a \$2bn three-year syndicated loan from 11 banks operating in the local debt market With other funds already secured, the loan means Argentina bas covered all but \$1.5bn of its \$3.9bn financing needs for the first quarter of next year.

The lenders are the Argentine and a group of international banks which act as market-makers for local Treasury instruments. They include Banco de Galicia, ING Bank, HSBC Banco Roberts, BankBoston and Citibank. The loan will be 70-75 per cent in dollars, with the remainder in Argentine pesos.

Argentina turned to the local market-makers after separate negotiations for a syndicated loan from International banks foundered as a result of the global market turmoil in late October.

Despite the market volatility, Argentina has since ist government and the made two forays into the international bond markets, including an innovative \$500m "adjusted spread" bond launched last week.

Debt service alone will be payable in the first two ears, with the principal to be repaid in 12 instalments over the third year. However, Argentina is leaving open the option of extending or restructuring the loan if market conditions allow.

Interest will be variable, fixed at a level set by e Central Bank survey of average deposit rates plus 325 basis points, or by the results of the latest auction of 91-day Treasury bills plus 100 basis points, whichever is the

won rec

Strong demand for IEC yankee

Israel Electric Corporation, the state-controlled electricity utility, yesterday closed a \$425m yankee bond issue, nearly one-third more than initially planned because of high demand. Yankee bonds are issued in the US domestic market by foreign borrowers.

Yesterday's transaction is an attempt by IEC to raise Sibn by the end of next year as part of an investment programme requiring an annual \$1.5bn until 2002. It is the fifth time in 12 months that IEC has issued bonds, which have been targeted mainly at US pension and mutual funds, as well as Japanese investors. The latest offering, however, was the first since the market turmoil in south-

east Asia.
"Investors are looking for stability, good ratings and the ability to pay back debt," one analyst said. "By emerging market standards, Israel has a very good credit rating." IEC is rated A. and A3, respectively, by Standard &

Poor's and Moody's. The latest bond issue was split into two parts: \$125m of 10-year bonds paying a coupon of 7.10 per cent, and \$300m of 30-year bonds paying of 7.75 per cent.

Lehman Brothers, lead manager, said the high demand

for the securities was "a vote of confidence" for IEC. Judy Dempsey, Jerusalem

DEVELOPING COUNTRIES

OPIC backs \$300m water fund

OPIC, the US export credit agency, yesterday gave its support to a \$300m fund described as the first to invest exclusively in improving water supplies in developing countries.

The fund, announced yesterday, is being organised by Aqua International, a private company based in San Franciso with backing from Chase Capital Partners, a subsidiary of Chase Manhattan Bank.

It will seek to tap into a growing market for privatised water services in developing countries, with an initial focus on Latin America and Indonesia rather than poorer areas which are less advanced on the road to water privatigation.

George Muñoz, president of OPIC, which will guarantee two-thirds of the fund, said that "with a majority of the world's population living without adequate sanitation", the fund would address e significant "human need".

It would also provide business opportunities for US water and technology companies in a market dominated by French and UK rivals. But William Reilly, the former US Environmental Protection Agency chief who will head the fund's management team, said investments would not be confined to projects involving US companies. Leyla Boulton, Environment Correspondent

Sterling's fall helps World Bank issue

INTERNATIONAL BONDS

By Samer Iskandar

The World Bank was the most active borrower in a ping the sterling and French franc sectors simulta-

The sterling-denominated five-year notes were mainly aimed at retail investors, although the issue size of £300m also attracted some demand from institutions.

Priced to yield 24 basis expect sterling to be a popuin December 2003, the after the New Year. bonds offered a spread of UK yield curve - or 2 basis points less than European Investment Bank issues bank, confirmed it bad

WORLD BOND PRICES

with a similar maturity. "We saw good sales, although this is not the time of year wben issues sell out," sald Dresdner Klein-

wort Benson, lead manager. Demand was bolstered by sterling's fall since Monday. wbich made the bonds cbeaper to investors from continental Europe.

Sales to retail investors are slower than placement among institutions, which buy larger blocks of paper. Syndicate managers

points over gilts maturing lar sector among investors "For yield purposes, It offers the best value in Europe," said one. ABN Amro, the Dutch

closed its \$5.5bn Loop Funding for foreign currency with the election of a reforming securitisation. The deal. long-term deht was raised ist government and the the largest securitisation of corporate bonds to date, will enable the bank to re-allocate capital to more profitable activities. The assets used as collateral consist of US corporate loans denomi-

nated in dollars.

As a result, the rating of dollar-denominated Bulgar-over 240 per cent in Februian bonds rose to B2, while the ceiling for long-term bank deposits reached B3. "Bulgaria's credit risk has above \$2.5bn from a low of Bulgaria's country ceil- improved since mid-1997 New international bond issues

US credit rating agency.

STREET, MATTER'S

MARKETS REPORT By Richard Adams rency yesterday, appreciating against the US dollar.

The won gained 136.9 the US yesterday. against the dollar on the the Bank of Korea removed the currency's 10 per cent daily trading limit at the request of the International Monetary Fund.

Analysts said the won benefited as the market unwound its long dollar positions, built up over the past weeks as the won plunged by nearly 50 per cent in

Other regional currencies fared worse, with the Indonesian rupiah hit by rumours of President Suharto suffering a mild stroke, while the New Zealand dollar fell after central

Won recovers after decision to float

The German Ifo institute European opening hours was survey for November The beleaguered South very quiet, a combination of showed business confidence Korean won enjoyed its first the pre-Christmas slowdown still low, as market turbuday as a fully floating cur- and waiting for a decision lence in Asia began to take from the Federal Open Mar- Its toll. The key west Gerkets Committee meeting in man business climate index fell to 99.1, down from 99.7 in October and a September

> Asia turbulence continued to overhang the yen which remained weak against the dollar and mark, although little changed from Monday'a rates. Dealers await today's release of the Japanese government's stimulus package, postponed from yesterday. With much of package already known, anarose by a similar amount as lysts said there was little to

surprise the markets. Traders in Toronto said the Bank of Canada intervened yesterday, huying against the US dollar at C\$1.4240 after its currency weaksned to to its lowest point this week.

■ The won's rally was helped by central bank intervention and local exporters taking the opportunity to repairiate dollars before the

end of the year. Hopes that the International Monetary Fund will release more of its \$57 billion rescue package were also improved, following the decision to abandon daily trading limits on the won, and

NZ\$1.6902, following worries of a rise in the country's bal-South Rorea also raised its ance of payments.

point, to 8.6 per cent.

The Reserve Bank forecast have been breathing space the current account deficit would rise to 7.7 per cent of further bankruptcies and GDP in the year to next March, from 4.7 per cent last year. The bank's governor, Don Brash, said it faced major problems in setting monetary conditions due to after its central bank warned conflicting problems "which point the economy in dia-

> tions." Mr Brash said a depreciation of the New Zealand dollar represented another risk to maintaining low inflation if markets were to grow concerned at the worsening current account deficit.

The Australian dollar also lost ground against the US currency. The Aussie closed at A\$1.537, a fall of 1.4 cents.

price at 43/4-year low

By Kenneth Gooding

Platinum's price (ell to a 4%-year low yesterday. Traders said there was some aggressive selling while the market was full of rumours about Russian sales and a big drop in demand because of Asian financial turmoil.

Platinum, used mainly for car catalysts that remove polintants from automotive engines and in jewellery fell to US\$339 an ounce a one stage before closing in London at \$342.50, down \$12 an ounce. The price has dropped by \$40 an ounce, or more than 10 per cent, in the past week.

Jeremy Coombes, general manager, marketing, for Johnson Matthey, the world's biggest platinum marketing group, said there were indications that some speculative funds were selling their investments in commodities generally because of Asia's financial

But there was no reason to suspect platinum demand would be affected by "the fall-out from Asia".

Johnson Matthey saw no reason to alter its opinion, voiced tn last month's review of the market, that platinnm demand would substantially ontpace supply this year for the first time since 1988 and there would be a further supply deficit

Mr Coombes said there was no evidence that Russia. the second biggest platinnm producer, bad

increased exports. Nevertheless, although there had been much shortselling by funds - selling platinum they did not own in the expectation the price would fall and they could cover their positions at the lower price - this did not on its own seem to justify the fall in prices.

Platinum | Südelektra buys vanadium units | Profit-taking

blamed for fall in coffee

MARKETS REPORT

By Vincent Boland and Kenneth Gooding

Coffee prices tumbled in London and New York, in splte of reports of a sharperthan expected fall in US coffee stocks last month and in this year's output in Colombia, which fell 7.9 per cent in the 11 months to November. according to the National Coffee Growers' Association.

Traders said the news on both fronts was not a surprise and had been dis-counted, and the price falls were due to profit-taking.

After a rise in early trading on the London International Financial Futures and Options Exchange, prices fell when New York trading started lower. The Liffe March future closed down \$97 a tonne at \$1,715 a tonne. though turnover was not beavy.

On the New York Cotton, Sugar and Cocoa exchange the March future had fallen 14.2 cents a pound at noon, to 171.25 cents a pound, after the Green Coffee Association said supplies of green coffee stocks fell last month to just over 1.5m bags.

On Liffe, the March cocoa future fell £28 to close at £1.119 a tonne.

Crude oil prices edged higher yesterday afternoon after having hit their lowest point since February 1996 in early trading on London's International Petroleum Exchange. The price of benchmark

Brent Blend for January side was still active." delivery, the contract for Silver daily turnover in November averaged 327.9m which expired at the end of ounces valued at US\$1.7bm trading last night, slipped at compared with the October one point to \$17.10 a barrel, average of 345.5m ounces 16 cents down on Monday's close. It recovered in late also worth \$1.7bn. trading to around \$17.35 a

barrel.

Mr Elston pointed out that the silver price rose in

quoted higher, at around \$17.50 a barrel.

The wave of selling on the London Metal Exchange that sent prices plummeting on Monday continued yesterday and sent the price of copper to its lowest level for nearly four years.

Lead touched a 31/2-year low, tin was at a 2% year low while aluminium fell to to a one-year low.

nin Deal to

The same

Traders said the economic crisis in Asia had negative implications for base metals while some commodity funds and epeculators had been liquidating long positions. Producers were also hedging future production and adding to the metal available to the market.

Concern was heightened by rumours that some Asian consumers were being forced to default on contracts.

Copper at one point yester day fell below US\$1.745 a tonne, the level to which the price fell after the Sumitomo copper trading scandal erupted in June 1996. It traded at \$1.740, the lowest since January 1994.

Angus MacMillan, search manager at Billiton Metals, pointed out: "In the past metal prices fell on fundamentals. Now they preempt fundamentals. There are about 41/4 weeks of consumption in copper stocks whereas the normal level is 51/2 to six weeks.

"This means the market in the short term will be susceptible to supply disruptions or offtake from, say, China or Japan. In the long term, though, stocks inevitably will build."

The price of gold in late London trading firmed with some belp from New York to close 40 cents an ounce up from Monday's close at US\$285.40. Traders said gold's price was range-

Gas prices up for UK industry

By Robert Corzine

The UK has lost its standing as the country with the lowest natural gas prices for large business users, according to a survey by National Utility Services, a UK-based

consultant. Of the 13 countries covered by the survey. Canada - a big gas producer and exporter to the US - enjoyed the lowest domestic gas

prices during the year. Industrial and commercial gas prices in the UK, the most liberalised gas market in Europe, rose more than 23 per cent this year, after reg-

istering a 5 per cent increase in 1996. But the survey showed that UK gas prices remain the lowest in Europe in spite of the most recent price rises; a gas surplus in the UK forced prices down 40 per

cent in 1995. Andrew Johns, an NUS director, attributed the rise in UK prices to a tougher attitude towards certain segments of the commercial and industrial markets by a number of gas suppliers.

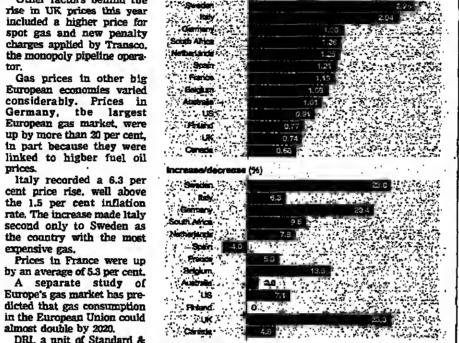

The earlier price declines were partly the result of fierce competition, as new share, even if individual contracts proved unprofitable. Suppliers this year balked at

Other factors behind the rise in UK prices this year included a higher price for spot gas and new penalty charges applied by Transco. the monopoly pipeline opera-

Gas prices in other big European economies varied considerably. Prices in Germany, the largest European gas market, were un by more than 20 per cent. in part because they were linked to higher fuel oil Italy recorded a 6.3 per

cent price rise, well above the 1.5 per cent inflation rate. The increase made Italy second only to Sweden as the country with the most expensive gas. Prices in France were up by an average of 5.3 per cent.

almost double by 2020. DRI, a unit of Standard & Poor's, sald Increased competition as a result of the planned, partlal liberalisation of the EU gas market could result in entrants battled for market substantial price reductions International gas price survey Average prices, year to September 1997 (pence per kilowatt hour)

LONDON STOCK EXCHANGE

FTSE 100 drives through the 5,200 barrier

MARKET REPORT

By Steve Thompson. **UK Stock Market Editor**

Further reassurance from the Asian markets, plus a confidenceboosting leap by Wall Street, injected renewed enthusiasm into London's equity market.

The FTSE 100 index made rapid progress for the third straight session, hurdling the 5,200 level and eventually settling a net 81.6 ahead at 5,203.4. The Dow Jones Industrial Average also accelerated back past the 8,000 mark.

Footsie has rallied 167.8, or 3.3 per cent, since Thursday night as previous peak. the market has recovered from

and Joel Kibazo

daily 10 per cent. Once again lt was the banks, specifically Abbey Netional and Alliance & Leicester, that featured prominently.

The index is now only around 164 points from its all-time intraday high, reached on October 2. Some optimists still maintain that the index may yet take a dart at the record before the year is out. The first expiry of the Footsie future under the new trading system, scheduled for Friday, may well play a big part in whether the index approaches its

Fed's expected reserve pushes stocks higher

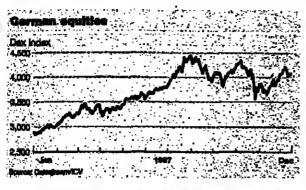

Most stock markets surged ahead yesterday, seemingly confident - With justification as it turned out - that the Federal Reserve's open market committee would not sanction a risa in LIS interest rates, writes Philip Coggon.

The US consumer price numbers, which showed a 0.1 per cent month-on-month rise at both the headline and core level, were weaker than expected. But events in Asia were seen as the main reason why tha Fed would leave

AMERICAS

A broadly-based rally took hold on Wall Street by midday as technology ahares improved and the Dow Jones Industrial Average climbed back above the 8,000-point level, writes John Labate in New York.

Further indications that inflation remains subdued added to the upbeat mood. The consumer price index rose a mere 0.1 per cent in November, better than most analysts had expected.

The low inflation reading cama as the Federal Reserve open market committee met to determine interest rate policy. Few analysts expect a rise in interest rates soon.

By early afternoon the blue-chip Dow wae 78.58 higher at 8,001.17, while the broader Standard & Poor's 500 index climbed 7.94 to

"A lot of what is happening this week is relative to what happened last week, when the market ovarreacted. We had a 310-point loss on the Dow, and people thought that Asia would fall apart," said Larry Wechtel, market analyst at Prudential

overnight assad concerns about the recently battered technology sector. The most imprassiva gains of the morning belonged to tha Nasdaq composite index which rose 20.87 or 1.4 per cent to 1,557.43.

The high-tech rebound spread to the Dow as well, as IBM and Hewlett-Packard were among the best performers in the blue-chip sector. IBM gained \$3% to \$104% while HP rose \$1# to \$63%.

Leading financial service companies were also solid risers, with Amsrican Express rising \$2% to \$91. But banking stocks were

more mixed. Shares in Chase Manhattan slid \$14 to \$112 after the company announced a management shake-up.

Dell Computer rebounded from Monday's losses, gaining \$3% to \$86% while rival Compaq Computer rose \$2

Micron Technology rose \$11 to \$231/4 in spite of s downgrading in the stock's rating by Merrill Lynch after the company reported weak-

er-than-expected earnings. A profits warning sent shares of paper company Georgia Pacific down \$1 to \$84H. RJR Nabisco rose \$% to \$36% after the company announced s restructuring

TORONTO rallied, with the strong opening on Wall Street helping to rebuild the confidance lost along with

Monday'e beavy falls. Johannesburg was closed for

ond golds sectors improved Calm in Asian markets noticeably. At noon, the 300 composite index at 6.607.70.

Royal Bank of Canada jumped C\$1.15 to C\$78.85 in spite of persistent talk of another official rise for interest rates. Toronto-Dominion Bank sdded 80 cents to C\$54.80.

Among golds, Barrick rose 30 cents to C\$24.70 and Placer Dome advanced 55 cents to C\$16.25. Alcan Aluminium gained

The heavyweight banks

EMERGING MARKET FOCUS

Seoul likely to stay volatile

The strong recovery of the Seoul bourse this week would suggest that financial calm has returned after recent turbulence, but analysts warn the markst is likely to remain volatile for

everal months. The stock markst has responded positively to government measures to boost share prices ahsad of tomorrow'e presidential election. The government injected Won11,800bn (\$7.2bn) into financial institutions to ease a liquidity shortage, while it allowed

the won to float from yesterday. The Seoul general share index climbed by 4.8 per cent to 404.26 yestsrday after a 7.2 per cent jump on

Monday. Freeing the won from a daily trading band and allowing it to float is considered particularly important since it increases the

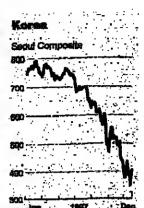

chances of the currency quickly finding its natural level against the dollar. That would assure overseas investors who have stayed out of the market in spite of the near doubling of the foreign shareholding limit to 50 per cent

because they are worried about foreign exchange losses after the won lost half of its value this year. The won's stability will depend on Korea's commitment to implementing the tough terms of the International Monstary Fund's \$57bn rescue. If the IMF is satisfied with Korea's progress, the inflow of dollars

will help restore confidence in the won. The pace and depth of the reforms proposed by the IMF will largely depend on Korea's next president. The election of Kim Daeindex finished at 8,198,63, up iong, the veteran centre-left opposition leader and front-

runner, could spook foreign investors. Mr Kim has criticised the IMF deal, but he recently pledged support after opponents claimed his remarks were fuelling the

financial turmoil.

The selection of Lee Hoichang, the government canfavourably by overseas investors because of his

consistent support for the IMF agreement. The outcome of the presi dential election might reduce uncertainty about Korea's willingness to pursue reforms, but weak cor-

porate fundamentals could still deter foreign investors. Most blue-chip Korean companies are likely to report net losses this year and next because the won's sharp fall has increased costs in servicing foreign debt. Profits will also be harmed by price deflation for the nation'e main

export products, including semiconductors, cars, steel, and petrochemicals, due to ss production capacity. High interest rates of 18-20 per cent would make the bond market, which was recently opened wider

to foreign investors, an attractive alternative to the stock market. Foreign intarest in the stock market is likely to focus on possible mergers and acquisitions as highly leveraged conglomerates restructure to raise capital by selling off subsidiaries. The government recently relaxed rules on foreign

nies, although it has barred

hostile bids.
